[The Australian Journal of Experimental Biology and Medical Science](#) Penguin In 2015, building on the advances of the Millennium

Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. *Crossing the Global Quality Chasm: Improving Health Care Worldwide* focuses on one particular shortfall in health care affecting global populations: defects in the quality

of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. *Crossing the Global Quality Chasm* emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential

guide for key stakeholders, governments, donors, health systems, and others involved in health care.

PC Mag

Springer

Nature

This book constitutes the refereed proceedings of the 19th International Conference on Innovations for Community Services, I4CS 2019, held in Wolfsburg, Germany, in June 2019. The 16 revised full papers presented in this volume were carefully reviewed and selected from 43 submissions.

The papers are

organized in topical sections on communication systems; teaching and collaboration; smart cities; innovations and digital transformation; data analytics and models; community and quality.

Innovations
for Community
Services
This manual
enables
individuals
working in
children's
palliative
care (CPC)
globally to
learn through
engaging real-
world cases.
The aim is to
provide a
clinical case-
based resource
that is
globally
relevant and
accessible to
those working
in CPC.
Drawing on
case histories
from around
the world that
reflect key
issues and
elements of
CPC, it

provides a
practical
approach
grounded in
experience. It
addresses multi
disciplinary
care in the
management of
children and
their families;
discusses cases
from an
international
perspective,
and shares
examples from a
variety of
countries,
utilising cases
across a range
of ages and
conditions,
demonstrating
holistic care.
It represents
the first case-
based manual on
global CPC and
is endorsed and
promoted by the
International
Children's

Palliative Care
Network
(ICPCN).
Children's
palliative care
is a rapidly
developing
field, both in
the UK and inte
rnationally.
The provision
of CPC varies
considerably,
with provision
often being
insufficient,
and over 65% of
countries
having no
recognised CPC
service
provision
whatsoever. As
such, while
there are an
estimated 21.6
million
children who
require
palliative
care, in many
areas of the
world, CPC is

poor or non-existent, and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC, hence this clinical case-based manual fills a gap in the market, and is aimed at a global audience, making it a unique text in the field.
