The Tishman Construction Management Program (TCMP) is housed within the Department of Civil and Environmental Engineering at the University of Michigan and offers a world-class and innovative education and research program in Construction Engineering and Management (CEM). The University of Michigan has been a pioneer in construction education and research and launched the first graduate program in Construction Engineering and Management in 1954.

Construction Engineering and Management. Groundbreaking research is a key component of the resiliency and success of the construction industry. Even minute breakthroughs in construction research have the potential to improve processes and create significant cost and time savings. Cutting-edge research is critical for the planning, design, construction, operations, maintenance, rehabilitation, performance, evaluation and life-cycle analysis of constructed facilities.
