System science and engineering is a field that covers a wide spectrum of modern technology. A system can be seen as a collection of entities and their interrelationships, which forms a whole greater than the sum of the entities and interacts with people, organisations, cultures and activities and the interrelationships among them. Systems composed of autonomous subsystems are not new, but the increased complexity of modern technology

demands ever more reliable, intelligent, robust and adaptable systems to meet evolving needs. This book presents papers delivered at the International Conference on System Science and Engineering (ICSSE2015), held in Morioka, Japan, in July 2015. Some of the topics covered here include: systems modeling, tools and simulation; cloud robotics and computing systems; systems safety and security; smart grid, human systems and industrial organization and management; and novel applications of systems engineering and systems architecture. Capturing as it does the latest state-of-the-art and challenges in system sciences and its supporting technology, this book will be of interest to all those involved in developing and using system science methodology, tools and techniques

Deep insights into human consciousness
revealed by accounts of travel to other
planets, moons, and stars • Includes
interviews with 7 people who have had
extra-planetary experiences, including
astronaut Edgar Mitchell, Norma
Milanovich, and Ingo Swann • Reveals
the positive effects of these events on the
interviewees ' lives, from cosmic
consciousness and loss of fear of death to
enhanced spiritual insights •
Contextualizes these accounts with 19th-
and 20th-century reports as well as alien-
human encounters in ancient Sumerian,
Vedic, Egyptian, Tibetan, and biblical
records Since prehistoric times all cultures
report encounters with strange beings and

crafts from the sky as well as stories of extra-planetary experiences--that is, travel to other planets, moons, and stars. In the case of modern accounts, these benevolent alien-human interactions bear striking resemblance to one another, even among people with no knowledge of other alien-human claims. And all experiences marked a spiritual turning point in the person's life, providing a loss of the fear of death, enhanced spiritual insights, a connection to cosmic consciousness, or increased motivation to be of service to humanity. Exploring fresh dimensions of ET contact and extra-planetary experience (XPE) using Harvard professor and researcher John Mack's witnessing approach to paranormal incidents, Thomas Streicher interviews 7 renowned people who have experienced XPE--including astronaut Edgar Mitchell, Norma Milanovich, and Stanford-tested remote viewer Ingo Swann--and shares the positive spiritual effects of XPE on their lives. Placing their experiences in the context of historical accounts of alien-human encounters from ancient Sumerian, Vedic, Egyptian, Tibetan, Hopi, Dogon, and biblical records as well as 19th- and 20th-century testimonies from Orfeo Angelucci, Billy Meier, Elizabeth Klarer, and others, the author reveals the similarities of these experiences with those of his interviewees. Streicher shows these experiences are not contrived hallucinations but genuine transformative spiritual awakenings akin to near-death and

out-of-body experiences.
