The power of transformative

design, multidisciplinary leaps, and diversity: lessons from a Black professional's journey through corporate America. Design offers so much more than an aesthetically pleasing logo or banner, a beautification add-on after the heavy lifting. In *Reimagining Design*, Kevin Bethune shows how design provides a unique angle on problem-solving—how it can be leveraged strategically to cultivate innovation and anchor multidisciplinary teamwork. As he does so, he describes his journey as a Black professional through corporate America, revealing the power of transformative design, multidisciplinary leaps, and diversity. Bethune, who began as

an engineer at Westinghouse, moved on to Nike (where he designed Air Jordans), and now works as a sought-after consultant on design and innovation, shows how design can transform both individual lives and organizations. In Bethune's account, diversity, equity, and inclusion emerge as a recurring theme. He shows how, as we leverage design for innovation, we also need to consider the broader ecological implications of our decisions and acknowledge the threads of systemic injustice in order to realize positive change. His book is for anyone who has felt like the "other"—and also for allies who want to encourage anti-racist, anti-sexist, and anti-ageist behaviors in

---

the workplace. Design transformation takes leadership—leaders who do not act as gatekeepers but, with agility and nimbleness, build teams that mirror the marketplace. Design in harmony with other disciplines can be incredibly powerful; multidisciplinary team collaboration is the foundation of future innovation. With insight and compassion, Bethune provides a framework for bringing this about.

The Telling Penguin Women Kind is an impeccably researched love letter to those who hold up half the sky.' Jamila Rizvi 'Just like

#CelebratingWomen, this book is an essential and timely reminder of the collective power of women.' Kate Jenkins, Australian Sex Discrimination Commissioner Women are rallying together in a massive and unstoppable force to make their voices heard around the world in ways we have never seen before. When Dr Kirstin Ferguson, an Australian company director, decided she

was fed up with the vicious online abuse of women, she turned the tables and used social media to create the #CelebratingWomen campaign, profiling two women from anywhere in the world and every walk of life, every day for a year. The response was overwhelming. In Women Kind, Ferguson joins Walkley award-winning journalist and leading commentator on women in the workplace

---

Catherine Fox to examine how women's shared clout is transforming communities, workplaces and leadership; show that every woman is a role model; and challenge the idea that women regularly turn on each other for scarce seats at the top table. Ferguson and Fox urge us to get on board and forget the old saying that when a woman climbs the corporate

ladder, she needs to send it back down to help one other woman. What's needed is a fishing net to bring up many women together, all supporting each other. There has never been a better moment to join our voices, share experiences and celebrate the power of women supporting women.

and additional resources for our professional and personal goals. It turns out we're wrong. Using captivating stories to illustrate research in psychology and management, Rice University professor Scott Sonenshein examines why some people and organizations succeed with so little, while

others fail with so much. People and organizations approach resources in two different ways: "chasing" and "stretching." When chasing, we exhaust ourselves in the pursuit of more. When stretching, we embrace the resources we already have. This frees us to find creative and productive ways to solve problems,

innovate, and engage our work and lives more fully. Stretch shows why everyone—from executives to entrepreneurs, professionals to parents, athletes to artists—performs better with constraints; why seeking too many resources undermines our work and well-being; and why even those with a lot benefit from

making the most out of a little. Drawing from examples in business, education, sports, medicine, and history, Scott Sonenshein advocates a powerful framework of resourcefulness that allows anybody to work and live better.

bestselling and critically acclaimed debut novel by Lisa Halliday, hailed as "extraordinary" by The New York Times, "a brilliant and complex examination of power dynamics in love and war" by The Wall Street Journal, and "a literary phenomenon" by The New Yorker. Told in three distinct and uniquely compelling sections, *Asymmetry* explores the imbalances that spark and sustain many of our most dramatic human relations: inequities in age, power, talent, wealth, fame, geography, and justice. The first section, "Folly," tells the story of Alice, a young American editor, and her relationship with the famous and much older writer Ezra Blazer. A tender and exquisite account of an unexpected romance that takes place in New York during the early years of the Iraq War, "Folly" also suggests an aspiring novelist's coming-of-age. By contrast, "Madness" is narrated by Amar, an Iraqi-American man who, on his way to visit his brother in Kurdistan, is detained by immigration officers and spends the last weekend of 2008 in a holding room in Heathrow. These two seemingly disparate

---

stories gain resonance as their perspectives interact and overlap, with yet new implications for their relationship revealed in an unexpected coda. A stunning debut from a rising literary star, *Asymmetry* is "a transgressive roman a clef, a novel of ideas, and a politically engaged work of metafiction" (The New York Times Book Review), and a "masterpiece" in the original sense of the word" (The Atlantic). Lisa Halliday's novel will captivate any reader with while also posing arresting questions about the very nature of fiction itself. The Unreal and the Real Simon and Schuster Life Can Be Hard. In GREEN LIKE GOD, Jonathan Merritt gently and insightfully observes that the bible has a lot to say about environmental problems like unclean water, material waste, over

consumption, air pollution, and global warming. In fact, Jonathan writes that "in the book of Genesis, God went green and never looked back." Relying heavily on scripture, Jonathan gives the case for green living, but not because it's trendy and hip. Rather, it's part of living rightly as a believer. It's an act of obedience to our Creator-God. GREEN

Sutty, an Observer from Earth for the interstellar Ekumen,

has been assigned to a new world—a world in the grips of a stern monolithic state, the Corporation. Embracing the sophisticated technology brought by other worlds and desiring to advance even faster into the future, the Akans recently outlawed the past, the old calligraphy, certain words, all ancient beliefs and ways; every citizen must now be a producer-consumer. Their state, not unlike the China of the Cultural Revolution, is

one of secular terrorism. Traveling from city to small town, from loudspeakers to bleating cattle, Sutty discovers the remnants of a banned religion, a hidden culture. As she moves deeper into the countryside and the desolate mountains, she learns more about the Telling—the old faith of the Akans—and more about herself. With her intricate creation of an alien world, Ursula K. Le Guin compels us to reflect on our own recent history.
