Unsaturated | definition of unsaturated by Medical dictionary

Unsaturated solutions are those solutions which contain less amount of solute in them than that of

the actual amount of solvent which can be dissolved. If more amount of solutes in a solution, then that solution will be considered as a saturated.

unsaturated definition: 1. not saturated 2. Chem. 3. designating or of a compound in which some element possesses the capacity of combining further with other elements 4. designating or of a solution that is not in equilibrium with the undissolved solute ...

Types of Saturation - Chemistry LibreTexts

An unsaturated solution is a chemical solution in which the solute concentration is lower than its equilibrium solubility. All of the solute dissolves in the solvent. All of the solute dissolves in the solvent.

What is an Unsaturated Solution - ScienceStruck

The definition of a supersaturated solution is one which contains more dissolved solute than could ordinarily dissolve into the solvent. A minor disturbance of the solution or introduction of a "seed" or tiny crystal of solute will force crystallization of excess solute.

Unsaturated Solution Definition

Solution in which no more solute could be dissolved at a fixed

temperature is known as saturated solution. Unsaturated solution means more solute could be dissolved at any fixed temperature. Unsaturated Solution: Definition & Examples - Video ...

1. not having all affinities of its elements satisfied (unsaturated compound). 2. not holding all of a solute that can be held in solution by the solvent (unsaturated solution). 3. denoting compounds in which two or more atoms are united by double or triple bonds.

Saturated solution definition and meaning | Collins ...

Definition An unsaturated solution is one that still has a capacity to dissolve more solute. Any such solution, is in a condition where it still hasn't reached the saturation limit. An example is NaCl in water.

Saturated Solution: Definition & Examples - Video & Lesson ...

A saturated solution is a solution that contains the maximum amount of solute that can be dissolved under the condition at which the solution exists. In chemistry, after studying solutions and properties of the solution, one can understand that a solution can reach a status of saturation.

Unsaturated | Definition of Unsaturated at Dictionary.com

Unsaturated Solution: A solution (with less solute than the saturated solution) that completely dissolves, leaving no remaining substances.

Supersaturated Solution: A solution (with more solute than the saturated solution) that contains more undissolved solute than the saturated solution because of its tendency to crystallize and precipitate.

saturated, unsaturated, and supersaturated Flashcards ...

Summary Saturated and unsaturated solutions are defined. Solution equilibrium exists when the rate of dissolving equals the rate of recrystallization.

Saturated Solution Definition and Examples

When a saturated solution is placed in contact with additional solute, solute neither dissolves nor is deposited. When water, or any solvent, has dissolved as much of any substance as it can, it is a saturated solution. A saturated solution is a solution in which there is so much solute that if ...
