From the acclaimed Booker Prize-winning author comes a dazzling novel of family, love and love's disappointments Anna's aged mother is dying. Condemned by her children's pity to living, subjected to increasingly desperate medical interventions, she turns her focus to her hospital window, through which she escapes into visions of horror and delight. When Anna's finger vanishes and a few months later her knee disappears, Anna too feels the pull of the window. She begins to see that all around her, others are similarly vanishing, yet no one else notices. All Anna can do is keep her mother alive. But the window keeps opening wider, taking Anna and the reader ever deeper into an eerily beautiful story of grief and possibility, of loss and love and orange-bellied parrots. Hailed on publication in Australia as Richard Flanagan's greatest novel yet, *The Living Sea of Waking Dreams* is a rising ember storm illuminating what remains when the inferno beckons: one part elegy, one part dream, one part hope.

"Unsettled is a remarkable book—probably the best book on climate change for the intelligent layperson—that achieves the feat of conveying complex information clearly and in depth." —Claremont Review of Books "Surging sea levels are inundating the coasts." "Hurricanes and tornadoes are becoming fiercer and more frequent." "Climate change will be an economic disaster." You've heard all this presented as fact. But according to science, all of these statements are profoundly misleading. When it comes to climate change, the media, politicians, and other prominent voices have declared that "the science is settled." In reality, the long game of telephone from research to reports to the popular media is corrupted by misunderstanding and misinformation. Core questions—about the way the climate is responding to our influence, and what the impacts will be—remain largely unanswered. The climate is changing, but the why and how aren't as clear as you've probably been led to believe. Now, one of America's most distinguished scientists is clearing away the fog to explain what science really says (and doesn't say) about our changing climate. In *Unsettled: What Climate Science Tells Us, What It Doesn't, and Why It Matters*, Steven Koonin draws upon his decades of experience—including as a top science advisor to the Obama administration—to provide up-to-date insights and expert perspective free from political agendas. Fascinating, clear-headed, and full of surprises, this book gives readers the tools to both understand the climate issue and be savvier consumers of science media in general. Koonin takes readers behind the headlines to the more nuanced science itself, showing us where it comes from and guiding us through the implications of the evidence. He dispels popular myths and unveils little-known truths: despite a dramatic rise in greenhouse gas emissions, global temperatures actually decreased from 1940 to 1970. What's more, the models we use to predict the future aren't able to accurately describe the climate of the past, suggesting they are deeply flawed. Koonin also tackles society's response to a changing climate, using data-driven analysis to explain why many proposed "solutions" would be ineffective, and discussing how alternatives like adaptation and, if necessary, geoengineering will ensure humanity continues to prosper. *Unsettled* is a reality check buoyed by hope, offering the truth about climate science that you aren't getting elsewhere—what we know, what we don't, and what it all means for our future.

Forget everything you think you know about strength, strategy and success. This brilliant adaptation of the ancient masterpiece *The Art of War* shows women how to use Sun Tzu's philosophy to win in every aspect of life. Would you like to transform your weaknesses into strengths? Succeed at work without compromising your ethics? Integrate your style and personal philosophy into every action you take? If so, this book is for you. In *The Art of War for Women*, bestselling author Chin-Ning Chu brings the eternal wisdom of philosopher-general Sun Tzu to women looking to gain a better understanding of who they are—and, more

importantly, who they want to be. Although Sun Tzu's book is about the application of strategies and determining the most efficient way of gaining victory with the least amount of conflict, every one of those strategies begins with having a deep understanding of the people and the world around us. They also require us to understand ourselves—our strengths and weaknesses, our goals and fears. In other words, the aim is not to apply a series of rules coldly and dispassionately, but rather to integrate ourselves and our unique talents into the strategies we will employ. This is not a feel-good book. (But you will feel good after reading it.) It is not a motivational book. (But you will be motivated to achieve what you want, once you are done.) Ultimately, its purpose is to provide women with the strategies we all need to overcome the obstacles that stand in the way of our goals and dreams. Sun Tzu's *Art of War* is the most influential book on strategy ever published, selling tens of millions of copies worldwide in several editions. Written by one of today's foremost authorities on Sun Tzu, *The Art of War for Women* is sure to become a classic in its own right.

"... Concise explanations and descriptions - easily read and readily understood - of what we know of the chain of events and processes that connect the Sun to the Earth, with special emphasis on space weather and Sun-Climate." --Dear Reader. [Outliers](#) Rowman & Littlefield Publishers

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession. "What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous *Global Trends* reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of *Global Trends 2030*. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

[The Mythology of Global Warming](#) Unstoppable Global Warming

Where are we heading? Stripped of all the hype and fantasy — where really is the world economy set to take us by 2040? Those of us alive today are on an extraordinary course: For several decades our future has largely been determined by a handful of relatively-obscure trends that together generate the awesome propulsion of a High-Tech engine that is launching the international community on a voyage into completely unfamiliar territory. But where will we all end up? Based on unparalleled insights into what organizations across the globe are actually doing, for the first time the world's foremost expert on the hidden inner-workings of society explains in simple and accessible language exactly where the most deeply-established trends are taking us. How, despite claims that its accelerating progress is not sustainable for much longer, Digitization is on an inexorable course to a mind-blowing society of virtual-assistants, robot cars, cyborgs and everything on-the-record. And how Networking will combine with Digitization to lead by 2040 to computers capable of human-like interaction and an internet a billion times more powerful than today's. Dr. Scott-Morgan reveals how the Miniaturization trend offers nanotech breakthroughs ranging from cancer treatments to quantum computing — but not, as has often been claimed, Star-Trek Replicators or the threat of 'grey goo'. And he shows how exponential Simulation will support fundamental and sweeping advances that lead to almost limitless electricity and maybe almost limitless life-extension. Our world is set for a Global Renaissance. However, the backdraft of the High-Tech launch engine is also stirring up a turbulence of unintended consequences that threaten to disrupt our trajectory. Rather than Global Renaissance, we would then enter Global Chaos. Yet these are not ordinary times. In the startling conclusion to his book, Dr. Scott-Morgan reveals how in only the last couple of years a brand new exponential

trend has begun to emerge out of the turbulence. In terms of influencing our destination — whether we end up in a Global Renaissance or in Global Chaos — it is that trend that will be the most important one of all. NOTE: This is the companion volume to 'The Reality of Global Crises' by the same author.

[The Living Sea of Waking Dreams](#) Random House

A reexamination of the evidence advanced for human caused global warming by Australia's leading environmental scientist. His conclusion: humans are one of many factors driving climate change, and a minor one at that.

[Unsettled](#) Princeton University Press

"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction." --Provided by publisher.

Maya Angelou's unforgettable collection of poetry lends its name to the documentary film about her life, *And Still I Rise*, as seen on PBS's *American Masters*. Pretty women wonder where my secret lies. I'm not cute or built to suit a fashion model's size But when I start to tell them, They think I'm telling lies. I say, It's in the reach of my arms, The span of my hips, The stride of my step, The curl of my lips. I'm a woman Phenomenally. Phenomenal woman, That's me. Thus begins "Phenomenal Woman," just one of the beloved poems collected here in Maya Angelou's third book of verse. These poems are powerful, distinctive, and fresh—and, as always, full of the lifting rhythms of love and remembering. *And Still I Rise* is written from the heart, a celebration of life as only Maya Angelou has discovered it. "It is true poetry she is writing," M.F.K. Fisher has observed, "not just rhythm, the beat, rhymes. I find it very moving and at times beautiful. It has an innate purity about it, unquenchable dignity. . . . It is astounding, flabbergasting, to recognize it, in all the words I read every day and night . . . it gives me heart, to hear so clearly the caged bird singing and to understand her notes."

[And Still I Rise](#) Harvard University Press

#1 NEW YORK TIMES BESTSELLER • "The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon." —Andrew Solomon, author of *The Noonday Demon* With a new afterword It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An "epoch-defining book" (*The Guardian*) and "this generation's *Silent Spring*" (*The Washington Post*), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today's. Praise for *The Uninhabitable Earth* "The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-

knuckled tour through the cascading catastrophes that will soon engulf our warming planet. ” —Farhad Manjoo, *The New York Times* “ Riveting. . . . Some readers will find Mr. Wallace-Wells’ s outline of possible futures alarmist. He is indeed alarmed. You should be, too. ” —*The Economist* “ Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘ eerily banal language of climatology ’ in favor of lush, rolling prose. ” —Jennifer Szalai, *The New York Times* “ The book has potential to be this generation’ s Silent Spring. ” —*The Washington Post* “ The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book. ” —Alan Weisman, *The New York Review of Books*

#### The Serengeti Rules Crown

With echoes of Toni Morrison's *Beloved*, Yejid é 's novel explores a forgotten quadrant of Washington, DC, and the ghosts that haunt it. "Yejid é ’ s writing captures both real news and spiritual truths with the deftness and capacious imagination of her writing foremothers: Zora Neale Hurston, Toni Morrison and N.K. Jemisin...Creatures of Passage is that rare novel that dispenses ancestral wisdom and literary virtuosity in equal measure." --*Washington Post* "Creatures of Passage resists comparison. It's reminiscent of *Beloved* as well as the *Odyssey*, but perhaps its most apt progenitor is the genre of epic poems performed by the djelis of West Africa...All these otherwise clashing elements become, in this cast, a cohesive whole, telling us that this, too, is America." --*New York Times Book Review* "In its luminous prose, and its nods to mysticism and myth, the novel brings to mind the best of Toni Morrison. It ’ s that good."

--*Washington Post*, One of the Best Books about Washington, DC "Yejid é 's surreal new novel has no shortage of otherworldly surprises, but it's her this-worldly protagonist who steals the show...Informed by a richly woven mythology and propelled by themes of regret and revenge, *Creatures of Passage* has earned some apt comparisons to Toni Morrison's *Beloved*."

--*Philadelphia Inquirer*, One of the Best Books of Winter 2021 "Written over the course of 17 years, Morowa Yejid é ’ s new book, *Creatures of Passage*, is set in Anacostia in 1977 and follows twins--one living, one dead--who share names with the Egyptian gods Nephthys and Osiris. But that barely hints at the richness and complexity of the book ’ s many strands." --*Washingtonian* "Hauntingly magical, this sophomore novel by Morowa Yejid é centers a young woman dealing with the loss of her brother, her young great-nephew who mysteriously shows up at her door and Washington, DC, the city that provides an otherworldly backdrop to this imaginative thriller."

--*Ms. Magazine*, A Most Anticipated Book of 2021 “ Morowa Yejid é 's *Creatures of Passage* gives readers a chance to experience grief and intergenerational trauma in a unique way." --*The Root* "This enthralling, otherworldly story follows Nephthys Kinwell, a taxi driver in Washington, D.C., as she grapples with grief." --*Woman's World* "Comparisons to Toni Morrison's masterpiece *Beloved* always perk up our ears, but in the case of Morowa Yejid é ’ s *Creatures of Passage* the hype is warranted...History-haunted in the best sense, readers shouldn’ t miss this mythic thriller."

--*Chicago Review of Books* Nephthys Kinwell is a taxi driver of sorts in Washington, DC, ferrying passengers in a 1967 Plymouth Belvedere with a ghost in the trunk. Endless rides and alcohol help her manage her grief over the death of her twin brother, Osiris, who was murdered and dumped in the Anacostia River. Unknown to Nephthys when the novel opens in 1977, her estranged great-nephew, ten-year-old Dash, is finding himself drawn to the banks of that very same river. It is there that Dash--reeling from having witnessed an act of molestation at his school, but still questioning what and who he saw--has charmed conversations with a mysterious figure he calls the "River Man." When Dash arrives unexpectedly at Nephthys's door bearing a cryptic note about his unusual conversations with the River Man, Nephthys must face what frightens her most. Morowa Yejid é 's deeply captivating novel shows us an unseen Washington filled with otherworldly landscapes, flawed super-humans, and reluctant ghosts, and brings together a community intent on saving one young boy in order to reclaim itself.

Harvard Business Press

A cautionary but optimistic book about the world ’ s changing climate and the fate of humanity, from Christiana Figueres and Tom Rivett-Carnac—who led negotiations for the United Nations during the historic Paris Agreement of 2015. The authors outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris Agreement ’ s climate targets. In the other, they lay out what it will be like to live in a regenerative world that has net-zero emissions. They argue for confronting the climate crisis head-on, with determination and optimism. *The Future We Choose* presents our options and tells us what governments, corporations, and each of us can, and must, do to fend off disaster.

Unstoppable Global WarmingRowman & Littlefield Publishers

The Revenge of Gaia Vintage

Argues that global warming is a natural, cyclical phenomenon that has not been caused by human activities and that its negative consequences have been greatly overestimated.

The Art of Being Human BenBella Books

The key insight of Gaia Theory is that the entire Earth functions as a single living super-organism. But according to James Lovelock, the theory's originator, that organism is now sick. It is running a fever born of increased atmospheric greenhouse gases. Earth will adjust to these stresses, but the human race faces a severe test. It is already too late, Lovelock says, to prevent the global climate from “ flipping ” into an entirely new equilibrium that will threaten civilization as we know it. But we can do much to save humanity. In the tradition of *Silent Spring*, this is a call to address a major threat to our collective future. Unstoppable Crown

A read-aloud gem about teamwork and togetherness from *New York Times* bestselling author Adam Rex! If you could have any superpower, what would it be? Well, what if the answer was: ALL OF THEM! When a bird narrowly escapes the clutches of a hungry cat, a nearby crab admires the bird's ability to fly, while the bird admits a longtime yearning for claws. And, just like that, they team up. Pretty soon, the team includes every animal in the forest who's ever wanted someone else's special trait. But how will these animals stop humans from destroying the forest for a megamall? It's going to take claws, wings, and Congress together to be truly Unstoppable! Laura Park's bright, comic illustrations pair with bestselling author Adam Rex's laugh-out-loud text in this hilarious and insightful picture book about celebrating the ways you're unique, and using all your resourcefulness—and just a smidge of politics—to save the day. • Unstoppable! provides a timely lesson on the glories of diversity and the power of working together. • Perfect read-aloud book for children interested in animals, the environment, and political action For fans of *Nothing Rhymes with Orange*, *Here We Are: Notes for Living on Planet Earth*, *The Wolf the Duck and The Mouse*, and *Penguin Problems*. • Books for kids ages 3 – 5 • Read-aloud picture books • Picture books about Congress and government Adam Rex is an author, illustrator, and author-illustrator known for his books including *The Dirty Cowboy*, *School's First Day of School*, and *The True Meaning of Smekday*, which was adapted into the *DreamWorks* film *Home* in 2014. He lives in Tucson, Arizona. Laura Park is a cartoonist, illustrator, and enthusiastic baker from Chicago currently living in France.

This Changes Everything Vintage Canada

We all live with fear. It hangs around, whispering in our ears, reminding us of all we can't do or will never be. But that's not the end of the story. We also have a God who draws close to say, Fear not. I am with you. This Spirit transforms us into fear fighters--women breaking free of trepidation to find bold dedication to God's peace-, purpose- and joy-filled callings. With remarkable compassion born from personal experience, Kelly Balarie shows women how to · Cultivate unstoppable faith by harnessing God's Word and promptings · Pray panic-, blood pressure- and stress-reducing prayers to usher in lasting peace · Discover clear and immediate action plans to exchange worry for God's greatest gifts · Implement daily bravery decrees to stand armed through the day · Participate in a 12-week study guide to foster new courageous habits Kelly pulls back the curtain of fear so you can find the beautiful woman God created you to be.
