This Element examines what  
we can learn from religious  
disagreement, focusing on  
disagreement with possible  
selves and former selves, the  
epistemic significance of  
religious agreement, the

problem of disagreements between religious experts, and the significance of philosophy of religion. Helen De Cruz shows how religious beliefs of others constitute significant higher-order evidence. At the same time, she advises that we should not necessarily become agnostic about all religious matters, because our cognitive background colors the way we evaluate evidence. This allows us to maintain religious beliefs in many cases, while nevertheless taking the religious beliefs of others seriously.

Sandy van Calcar, M.S., RD University of Wisconsin *Handbook of Environmental and Sustainable Finance* Barron's Educational Series For seventeen-year-old high school dropout Jim Bathurst, the Marine Corps's reputation for making men out of boys was something he desperately needed when

he enlisted in March of 1958. What began as a four-year hitch lasted nearly thirty-six years and included an interesting assortment of duty stations and assignments as both enlisted and officer. *We'll All Die As Marines* narrates a story about a young, free-spirited kid from Dundalk, Maryland, and how the Corps captured his body, mind, and spirit. Slowly, but persistently, the Corps transformed him into someone whose first love would forever be the United States Marine Corps. It

---

documents not only his leadership, service, and training but also regales many tales of his fellow Marines that will have the reader laughing, cheering, and at times crying. In this memoir, Bathurst reveals that for him—a former DI who was awarded the Silver Star, Bronze Star Medal with Combat “V”, Purple Heart, and a combat commission to second lieutenant—the Corps was not a job, a career, or even a profession; it was—and still is—a way of life.

Max Pzoras is the poster child for the American Dream. The child of Greek immigrants who grew up in a dangerous New York housing project, he triumphed over his upbringing and became a successful Wall Street analyst. Yet on the frigid December night he's involved in a violent street scuffle, Max begins to confront questions about suffering and mortality that have dogged him since his mother's death. His search takes him to the farthest reaches of India, where he

encounters a mysterious night market, almost freezes to death on a hike up the Himalayas, and finds himself in an ashram in a drought-stricken village in South India. As Max seeks answers to questions that have bedeviled him—can yogis walk on water and live for 200 years without aging? Can a flesh-and-blood man ever achieve nirvana?—he struggles to overcome his skepticism and the pull of family tugging him home. In an ultimate bid for answers, he embarks on a dangerous solitary meditation in a

freezing Himalayan cave, where his physical and spiritual endurance is put to its most extreme test. By turns a gripping adventure story and a journey of tremendous inner transformation, *The Yoga of Max's Discontent* is a contemporary take on man's classic quest for transcendence.

This book describes the existential threats facing the global water systems from population growth

---

and economic development, unsustainable use, environmental change, and weak and fragmented governance. It argues that 'business-as-usual' water science and management cannot solve global water problems because today's water systems are increasingly complex and face uncertain future conditions. Instead, a more holistic, strategic, agile and publically engaged process of water decision making is

needed. Building Resilience for Uncertain Water Futures emphasises the importance of adaptation through a series of case studies of cities, regions, and communities that have experimented with anticipatory policy-making, scenario development, and public engagement. By shifting perspective from an emphasis on management to one of adaptation, the book emphasizes the capacity to manage uncertainties,

the need for cross-sector coordination, and mechanisms for engaging stakeholder with differing goals and conflict resolution. This book will be a useful resource for students and academics seeking a better understanding of sustainable water use, water policy and water resources management.
