General English for All Competitive Examinations Disha Publications

Zoroastrianism might be a fast-declining religion in today's world, but what is remarkable is its eternal enigma. It is hard to believe that the hymns of the faith have travelled down to us in accurate form and poetic metre, purely through the memory of generations of priests. Zarathustra, the founder of the faith, belonged to a period of Persian history which antedated the Achaemenid dynasty (from 550 BC to 330 BC). He followed the old Rigvedic religion until he was the first to receive a revelation from Almighty God. The Gathas—the most sacred

text of the Zoroastrian faith—were first composed and sung by Prophet Zarathustra. Along with the complete comprehension of the Gathas, consisting 238 verses in the same language as the Rigveda, this book is for anyone who wants to gain a deeper understanding of the purpose of life on earth and what happens to mankind after death. The Gathas are extremely relevant in modern times for the fundamental reason that they are timeless. They do not emanate from Prophet Zarathustra's mind, but are revelations from Almighty God, making them universal in their approach. This book is an attempt to help the reader fully comprehend these and choose the path of leading a righteous life.

Linear Ordinary Differential Equations, a text for advanced undergraduate or beginning graduate students, presents a thorough development of the main

topics in linear differential equations. A rich collection of applications, examples, and exercises illustrates each topic. The authors reinforce students' understanding of calculus, linear algebra, and analysis while introducing the many applications of differential equations in science and engineering. Three recurrent themes run through the book. The methods of linear algebra are applied directly to the analysis of systems with constant or periodic coefficients and serve as a guide in the study of eigenvalues and eigenfunction expansions. The use of power series, beginning with the matrix exponential function leads to the special functions solving classical equations. Techniques from real analysis illuminate the development of series solutions, existence theorems for initial value problems, the asymptotic behavior solutions, and the convergence of eigenfunction expansions.

A Nobel Laureate offers a dazzling new book about his native country India is a country with many distinct traditions, widely divergent customs, vastly different convictions, and a veritable feast of viewpoints. In *The Argumentative Indian*, Amartya Sen draws on a lifetime study of his country's history and culture to suggest the ways we must understand India today in the light of its rich, long argumentative tradition. The millennia-old texts and interpretations of Hindu, Buddhist, Jain, Muslim, agnostic, and atheistic Indian thought demonstrate, Sen reminds us, ancient and well-respected rules for conducting debates and disputations, and for appreciating not only the richness of India's diversity but its need for toleration. Though Westerners have often perceived India as a place of endless spirituality and unreasoning mysticism, he underlines its long tradition of skepticism and reasoning, not to mention its secular contributions to mathematics, astronomy, linguistics, medicine, and political economy. Sen discusses many aspects of India's rich intellectual and political heritage, including philosophies of governance from Kautilya's and Ashoka's in the fourth and third centuries BCE to Akbar's in the 1590s; the history and continuing relevance of India's relations with China more than a millennium ago; its old and well-organized calendars; the films of Satyajit Ray and the debates between Gandhi and the visionary poet Tagore about India's past, present, and future. The success of India's democracy and defense of its secular politics depend, Sen argues, on understanding and using this rich argumentative tradition. It is also essential to removing the inequalities (whether of caste, gender, class, or community) that mar Indian life, to stabilizing the now precarious conditions of a nuclear-armed subcontinent, and to correcting what Sen calls the politics of deprivation. His invaluable book concludes with his meditations on pluralism, on dialogue and dialectics in the pursuit of social justice, and on the nature of the Indian identity.
