Christopher Martin-Jenkins, or CMJ to his many fans as well as listeners of Test Match Special, was perhaps the voice of cricket; an unparalleled authority whose insight and passion for cricket, as well as his style of commentary, captured what it is that makes the sport so special. In his many years as a commentator and journalist - reporting for the BBC, The Times and the Cricketer among others - CMJ covered some of the biggest moments in the sport's history. And in this memoir he looks back on a lifetime spent in service to this most bizarre and beguiling of sports and tells the stories of the players, coaches and fans he met along the way. Recounted with all the warmth and vigour that has endeared CMJ to generations of cricket fans, this memoir relives the moments that defined modern cricket and which shaped his life in turn. It is a must-have book for all devotees of the sport.

Where the Ganges and the Jamna meet people from many, many different traditions of Hinduism come together. There will be many genuinely holy men, some charlatans, and some obscurantists. But the majority of those who come to bathe in the Sangam will be villagers. The Kumbh is an awe-inspiring demonstration of simple piety and a clear example of the power of myth. This is a small book presenting the Kumbh Mela, the biggest religious festival in India. The renowned journalist Mark Tully, who has covered with the BBC and as a free-lancer the main events in the recent history of India, gives in his inimitable style his impressions of the Kumbh Mela held at Allahabad in 1989.

A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer. Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In *Data for the People*, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work

for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be empowered by it.
