Learning resources are often considered key intellectual property in a competitive higher education world. However, more and more institutions and individuals are sharing their digital learning resources over the Internet, openly and for free, as open educational resources (OER). This study, building on previous OECD work on e-learning, asks why this is happening, who is involved, and what the most important implications of this development are. The report offers a comprehensive overview of the rapidly changing phenomenon of open educational resources and the challenges it poses for higher education. It examines reasons for individuals and institutions to share resources for free and looks at copyright issues, sustainability, and business models, as well as policy implications. Giving Knowledge for Free will be of particular interest to those involved in e-learning or strategic decisionmaking within higher education, to researchers, and to students of new technologies.

Essentials of Educational Measurement Elsevier
Chemical Engineering Design, Second Edition, deals with the application of chemical engineering principles to the design of chemical processes and equipment. Revised throughout, this edition has been specifically developed for the U.S. market. It provides the latest US codes and standards, including API, ASME and ISA design codes and ANSI standards. It contains new discussions of conceptual plant design, flowsheet development, and revamp design; extended coverage of capital cost estimation, process costing, and economics; and new chapters on equipment selection, reactor design, and solids handling processes. A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data, and Excel spreadsheet calculations, plus over 150 Patent References for downloading from the companion website. Extensive instructor resources, including 1170 lecture slides and a fully worked solutions manual are available to adopting instructors. This text is designed for chemical and biochemical engineering students (senior undergraduate year, plus appropriate for capstone design courses where taken, plus graduates) and lecturers/tutors, and professionals in industry (chemical process, biochemical, pharmaceutical, petrochemical sectors). New to this edition: - Revised organization into Part I: Process Design, and Part II: Plant Design. The broad themes of Part I are flowsheet development, economic analysis, safety and environmental impact and optimization. Part II contains chapters on equipment design and selection that can be used as supplements to a lecture course or as essential references for students or practicing engineers working on design projects. - New discussion of conceptual plant design, flowsheet development and revamp design - Significantly increased coverage of capital cost estimation, process costing and economics - New chapters on equipment selection, reactor design and solids handling processes - New sections on fermentation, adsorption, membrane separations, ion exchange and chromatography - Increased coverage of batch processing, food, pharmaceutical and biological processes - All equipment chapters in Part II revised and updated with current information - Updated throughout for latest US codes and standards, including API, ASME and ISA design codes and ANSI standards - Additional worked examples and homework problems - The most complete and up to date coverage of equipment selection - 108 realistic commercial design projects from diverse industries - A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data and Excel spreadsheet calculations plus over 150 Patent References, for downloading from the companion website - Extensive instructor resources: 1170 lecture slides plus fully worked solutions manual available to adopting instructors

Embargo is the first book to provide a comprehensive overview of oil sanctions. A group of authors, all of whom were intimately involved with the campaigning for and monitoring of the international oil embargo, reveals the story of South Africa's oil under apartheid from the first call for oil sanctions in 1960 to the final lifting in 1993. The book is aimed at readers interested in economic sanctions, the history of apartheid in South Africa, the international oil trade, and action-orientated research.

Encyclopedia of Electronic Circuits, Volume 7 Richmond, B.C. : Canadian Geotechnical Society
Following on from the successful first edition (March 2012), this book gives a clear explanation of what LTE does and how it works. The content is expressed at a systems level, offering readers the opportunity to grasp the key factors that make LTE the hot topic amongst vendors and operators across the globe. The book assumes no more than a basic knowledge of mobile telecommunication systems, and the reader is not expected to have any previous knowledge of the complex mathematical operations that underpin LTE. This second edition introduces new material for the current state of the industry, such as the new features of LTE in Releases 11 and 12, notably coordinated multipoint transmission and proximity services; the main short- and long-term solutions for LTE voice calls, namely circuit switched fallback and the IP multimedia subsystem; and the evolution and current state of the LTE market. It also extends some of the material from the first edition, such as inter-operation with other technologies such as GSM, UMTS, wireless local area networks and cdma2000; additional features of LTE Advanced, notably heterogeneous networks and traffic offloading; data transport in the evolved packet core; coverage and capacity estimation for LTE; and a more rigorous treatment of modulation, demodulation and OFDMA. The author breaks down the system into logical blocks, by initially introducing the architecture of LTE, explaining the techniques used for radio transmission and reception and the overall operation of the system, and concluding with more specialized topics such as LTE voice calls and the later releases of the specifications. This methodical approach enables readers to move on to tackle the specifications and the more advanced texts with confidence.

Sosu's Call, won the 1999 UNESCO 1st prize for Children's and Young People's Literature in the Service of Tolerance. It is listed as one of the top twelve titles of Africa's 100 Best Books; and has been named an Honor Book for Young Children by the African Studies Association's Children's Africana Book Committee, as a contribution to accurate and balanced material on Africa for children. Beautifully illustrated on artpaper, the story tells of Sosu, a young disabled boy who cannot walk. Sosu misses going to school and all the activities of the other children. His village is on a lagoon, and one day when everyone is away fishing, working in the fields or at school, he raises the alarm with his drumming, and saves the village from total destruction by the sea. His heroism is rewarded when a wheelchair is donated and at last he can go to school.

Hier lernen Sie, Expertensysteme auf der Basis von Fuzzy Logic zu konstruieren, die sich für den praktischen Einsatz eignen. Expertensysteme werden zunächst allgemein definiert, und die zugrundeliegende Mathematik wird eingeführt. Regelbasierte Systeme werden gründlicher besprochen als in jedem anderen Buch mit ähnlichem Thema. Am Ende jedes Kapitels können Sie Ihren Wissensstand anhand von Übungsaufgaben überprüfen. Von einem zugehörigen ftp-Server können Sie Ergänzungsmaterial abrufen. Für Praktiker und Forscher aus dem akademischen Umfeld gleichermaßen geeignet!
