The No Nonsense Guide to Minority Rights in South Asia is a practical primer on issues related to minority rights in South Asian countries. It delves into all major concepts and cutting edge theories that constitute the evolving minority rights discourse. The 'minority' in South Asia is typically characterized by 'non-dominance' and powerlessness, two major markers apart from language, culture, religion and ethnicity. This book explores the process of this kind of

'minoritization' in the region, evaluating the weaknesses of constitutional and legal frameworks that contribute to it. In doing so, it examines in detail the State's role in the socio-political recognition, protection and exclusion of minorities. By taking a rights-based approach, the book argues that nation-building in South Asia has been devoid of the commitment to expand the democracy and equality agenda and has instead been dominated by majoritarian and authoritarian policies. While elaborating on such politics of recognition and inequality, the author goes on to explore and

analyze the ethnic composition of each South Asian country—India, Pakistan, Nepal, Bangladesh, Sri Lanka and Bhutan. She also highlights the role of minority agencies in resisting injustice and exclusion, thus providing a comparative and holistic understanding of the minority discourse in the region. This book is an important reference resource for students and academics working in the areas of politics and international relations, especially on human rights, minority rights and state-building. It will also be a useful guide for activists.

Nicomachean Ethics Aristotle - The Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's Ethics

in his political philosophy as a whole. The Nicomachean Ethics has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

Does Class Matter? Springer
In the wake of the terrorist attacks on September 11, 2011, discussions on ties

between Islamic religious education institutions, namely madrassahs, and transnational terrorist groups have featured prominently in the Western media. In the frenzied coverage of events, however, vital questions have been overlooked: What do we know about the madrassahs? Should Western policymakers be alarmed by the recent increase in the number of these institutions in Muslim countries? Is there any connection between them and the "global jihad"? Ali Riaz responds to these questions through an in-

depth examination of the madraassahs in Pakistan, Bangladesh, and India. In Faithful Education, he examines these institutions and their roles in relation to current international politics.

This book engages readers
in thirteen conversations
presented by authors from
around the world regarding
the role that textbooks play

in helping readers imagine
membership in the nation.
Authors' voices come from
a variety of contexts – some
historical, some
contemporary, some
providing analyses over
time. But they all consider
the changing portrayal of
diversity, belonging and
exclusion in multiethnic and
diverse societies where
silenced, invisible,
marginalized members have
struggled to make their
voices heard and to have
their identities incorporated
into the national narrative.
The authors discuss
portrayals of past
exclusions around religion,

ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about “ who we are ” not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.
