This comprehensive book provides authoritative information on the storied history of the U.S. Army Corps of Engineers (ACE) and its many accomplishments. This illustrated history of the U.S. Army Corps of Engineers provides an

overview of the many missions that engineers have performed in support of the Army and the nation since the early days of the American Revolution. A permanent institution since 1802, the U.S. Army Corps of Engineers has effectively and proudly responded to changing defense requirements and has played an integral part in the development of the nation. Engineers have served in combat in all our nation's wars. Throughout the 19th century the Corps built coastal fortifications, surveyed roads and canals, eliminated navigational hazards, explored and mapped the western frontier, and constructed buildings and monuments in the nation's capital. In the 20th century, the Corps became the lead federal flood control agency. Assigned the military construction mission in 1941, the Corps constructed facilities at home and abroad to support the Army and the Air Force. During the Cold War, Army engineers managed construction programs for America's allies, including a massive effort in Saudi Arabia. Today, building on its rich heritage, the Corps is changing to meet the challenges of tomorrow. Our vision calls for us to be a vital part of the Army; the engineer team of choice, responding to our nation's needs in peace and war; and a values-based organization, respected, responsive, and reliable. The U.S. Army Corps of Engineers (Corps) is responsible for construction, operations, and maintenance of much of the nation's water resources infrastructure. This infrastructure includes flood control levees, multi-purpose dams, locks, navigation channels, port and harbor facilities, and beach protection infrastructure. The Corps of Engineers also regulates

the dredging and filling of wetlands subject to federal jurisdictions. Along with its programs for flood damage reduction and support of commercial navigation, ecosystem restoration was added as a primary Corps mission area in 1996. The National Research Council (NRC) Committee on U.S. Army Corps of Engineers on Water Resources Science, Engineering, and Planning was convened by the NRC at the request of the Corps of Engineers to provide independent advice to the Corps on an array of strategic and planning issues. National Water Resources Challenges Facing the U.S. Army Corps of Engineers surveys the key water resources challenges facing the Corps, the limits of what might be expected today from the Corps, and future prospects for the agency. This report presents several findings, but no recommendations, to the Corps of Engineers based on initial investigations and discussions with Corps leadership. National Water Resources Challenges Facing the U.S. Army Corps of Engineers can serve as a foundational resource for the Corps of Engineers, U.S. Congress, federal agencies, and Corps project co-sponsors, among others.
