Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

**Ranger Handbook (Large Format Edition)** Government Printing Office Bruce A. Glasrud and Deborah M. Liles have gathered over thirty years of scholarship—articles, book excerpts, and new, original essays—to offer for the first time an overview of the history of African Americans in Central Texas. From slavery and agriculture in the nineteenth century to entrepreneurship and the struggle for civil rights in the twentieth century, African Americans in Central Texas History: From Slavery to Civil Rights fills in the critical missing pieces of an often-overlooked region in the state's history. African Americans first entered Central Texas with Spanish explorers, but few remained. White slave holders later brought black residents—as slaves—to this region. With the end of the Civil War, slavery may have ended but the brutalities of racial prejudice persisted. During Reconstruction, new attempts to ensure civil and political rights were resisted through terror, racial violence, and systemic denial of justice. Well into the twentieth century, segregation persisted, but years of individual and mobilized protest finally led to significant reform. Organizations such as the NAACP provided vital support. Before efforts to disenfranchise the black vote became successful, some

politicians even courted black voters to further their own political agendas. African Americans in Central Texas History is a rare source that sheds light on the African American experience in the heart of the state.

The platoon leader and platoon sergeant are two of the most important leaders in the U.S. Army. The way platoon leaders and sergeants work together as a team can cause the success or failure of companies, battalions, brigades, and divisions. They represent the leading edge of leadership on and off the battlefield. On the battlefield, platoon leaders and sergeants build their platoons, empower squad leaders, integrate outside elements, and use troop-leading procedures to plan and lead.
