LARGE FORMAT - 8 1/2 by 11 inches, September 2017 The Army's basic mission is to train and prepare Soldiers, leaders, and units to fight and win in combat. As explained in the Army's capstone training doctrine (ADP 7-0), units do not have the time or the resources to achieve and sustain proficiency with every possible training task. Therefore, commanders must identify the tasks that are the units' critical wartime tasks. These tasks then become the unit's Mission Essential Task List. Commanders use the METL to develop their unit-training plan.

Noncommissioned officers plan the individual training that Soldiers need to become warriors and to accomplish the METL. The STPs, also known as Soldier's manuals, provide the critical individual tasks for each military occupational specialty that support all of the unit's missions. The NCO leadership uses the tasks in the SMs to train the Soldiers and measure the Soldiers' proficiency with these unit-critical tasks. The manuals provide task performance and evaluation criteria and are the basis for individual training and evaluation in the unit and for task-based evaluation during resident training. WINNING THE THREE-BLOCK WAR Learn how to prevail in offensive, defensive and stability urban operations! Full-size edition - LARGE 8.5" x 11" FORMAT: clear, detailed text & illustrations. Current, Complete & Unabridged. "Batteries last hours, books last decades: get the print edition!" Fighting in built-up areas presents unique challenges and constraints that can spell disaster for the unwary, drastically reducing the relative advantages of technological superiority, weapons ranges and firepower. Engagements can occur without warning, at extremely close range. Civilians can be difficult or impossible to distinguish from combatants. Entire columns of armored vehicles can be held at bay by a small group of fighters. If that was not sufficiently challenging, most urban societies are only a few meals away from chaos. Their populations may be hostile at the best of times, and their complex man-made physical terrain provides the ideal environment in which to wage guerrilla war. This handbook, created by the United States Army Combined Arms Center, demonstrates how to overcome the pitfalls of the urban landscape and turn them to your advantage - whether you are tasked with offensive operations, defensive preparations, or maintaining stability in the aftermath of conflict or natural disaster. Over fifty percent of the world's population now lives in large conurbations, and urban fighting is inevitable in any conflict. If you are not prepared to survive, command and operate in the multidimensional urban battlefield - you are not prepared at all.
