An unprecedented view of Green Beret training, drawn from the year Dick Couch spent at Special Forces training facilities with the Army's most elite soldiers. In combating terror, America can no longer depend on its conventional military superiority and the use of sophisticated technology. More than ever, we need men like those of the Army Special Forces – the legendary Green Berets. Following the experiences of one class of soldiers as they endure this physically and mentally exhausting ordeal, Couch spells out in fascinating detail the demanding selection process and grueling field exercises, the high-level technical training and intensive language courses, and the simulated battle problems that test everything from how well SF candidates gather operational intelligence to their skills at negotiating with volatile, often hostile, local leaders. Chosen Soldier paints a vivid portrait of an elite group, and a process that forges America's smartest, most versatile, and most valuable fighting force.

This work describes riverine combat during the Vietnam War, emphasizing the operations of the U.S. Navy's River Patrol Force, which conducted Operation Game Warden; the U.S. Army-Navy Mobile Riverine Force, the formation that General William Westmoreland said "saved the Mekong Delta" during the Tet Offensive of 1968; and the Vietnam Navy. An important section details the SEALORDS combined campaign, a determined effort by U.S. Navy, South Vietnamese Navy, and allied ground forces to cut enemy supply lines from Cambodia and disrupt operations at base areas deep in the delta. The author also covers details on the combat vessels,

helicopters, weapons, and equipment employed in the Mekong Delta as well as the Vietnamese combatants (on both sides) and American troops who fought to secure Vietnam's waterways. Special features focus on the ubiquitous river patrol boats (PBRs) and the Swift boats (PCFs), river warfare training, Vice Admiral Elmo R. Zumwalt Jr., the Black Ponies aircraft squadron, and Navy SEALs. This publication may be of interest to history scholars, veterans, students in advanced placement history classes, and military enthusiasts given the continuing impact of riverine warfare on U.S. naval and military operations in the 21st century. The platoon leader and platoon sergeant are two of the most important leaders in the U.S. Army. The way platoon leaders and sergeants work together as a team can cause the success or failure of companies, battalions, brigades, and divisions. They represent the leading edge of leadership on and off the battlefield. On the battlefield, platoon leaders and sergeants build their platoons, empower squad leaders, integrate outside elements, and use troop-leading procedures to plan and lead. Off the battlefield, platoon leaders and sergeants prepare their platoon for combat through tough training. The platoon leader and platoon sergeant's ability to coach, teach, and mentor their Soldiers leads directly to the readiness of our formations. Worldwide, platoon leaders and sergeants are personally leading the U.S. Army at the lowest level. This handbook is a guide for new leaders to help prepare them for a critical crucible of leadership that will determine the U.S. Army's ability to fight and win our country's wars.

The Army needs more Ranger qualified leaders. Ranger School cultivates the mindset needed for soldiers to win America's wars. It provides some of the most challenging circumstances that training can provide.

Under these circumstances, soldiers practice living by the Ranger Creed. This book is written for the current generation of Ranger candidates, for those who aim to graduate Ranger School and become the leaders the Army needs. Notably, this generation includes women, women who may not have access to female Ranger graduates. In support of these candidates and all those who are looking for information on a woman's experience in Ranger School, Erin McShane answers the questions most commonly asked of her as a female Ranger graduate and as the Army Engineer School Sapper/Ranger Train-Up's Lead Instructor including: How should I prepare for Ranger School? As a woman, what strengths did you have to offer? What mental strategies did you use? and What was it like to shave your head?

Called to action on 2 April 1982, the men of 45 Commando Royal Marines assembled from around the world to sail 8,000 miles to recover the Falkland Islands from Argentine invasion. Lacking helicopters and short of food, they yomped in appalling weather carrying overloaded rucksacks, across the roughest terrain. Yet for a month in mid-winter, they remained a cohesive fighting-fit body of men. They then fought and won the highly successful and fierce night battle for Two Sisters, a 1,000 foot high mountain which was the key to the defensive positions around Stanley. This is a first hand

story of that epic feat, but it is much more than that. The first to be written by a company commander in the Falklands War, the book gives a compelling, vivid description of the yomp and infantry fighting, and it also offers penetrating insights into the realities of war at higher levels. It is a unique combination of descriptive writing about front-line fighting and wider reflections on the Falklands War, and conflict in general. Gritty and moving; sophisticated, reflective and funny, this book offers an abundance of timeless truths about war. Postscript: Yomping was the word used by the Commandos for carrying heavy loads on long marches. It caught the public's imagination during this short but bitter campaign and epitomized the grim determination and professionalism of our troops.

In the spring of 1972, North Vietnam invaded South Vietnam in what became known as the Easter Offensive. Almost all of the American forces had already withdrawn from Vietnam except for a small group of American advisers to the South Vietnamese armed forces. The 23rd ARVN Infantry Division and its American advisers were sent to defend the provincial capital of Kontum in the Central Highlands. They were surrounded and attacked by three enemy divisions with heavy artillery and tanks but, with the help of air power, managed to successfully defend Kontum and prevent South Vietnam from being cut in half and defeated. Although much has been written about the Vietnam War, little of it addresses either the Easter Offensive or the Battle of Kontum. In *Kontum: The Battle*

to Save South Vietnam, Thomas P. McKenna fills this gap, offering the only in-depth account available of this violent engagement. McKenna, a U.S. infantry lieutenant colonel assigned as a military adviser to the 23rd Division, participated in the battle of Kontum and combines his personal experiences with years of interviews and research from primary sources to describe the events leading up to the invasion and the battle itself. *Kontum* sheds new light on the actions of U.S. advisers in combat during the Vietnam War. McKenna's book is not only an essential historical resource for America's most controversial war but a personal story of valor and survival.

Bruce A. Glasrud and Deborah M. Liles have gathered over thirty years of scholarship—articles, book excerpts, and new, original essays—to offer for the first time an overview of the history of African Americans in Central Texas. From slavery and agriculture in the nineteenth century to entrepreneurship and the struggle for civil rights in the twentieth century, *African Americans in Central Texas History: From Slavery to Civil Rights* fills in the critical missing pieces of an often-overlooked region in the state's history. African Americans first entered Central Texas with Spanish explorers, but few remained. White slave holders later brought black residents—as

slaves—to this region. With the end of the Civil War, slavery may have ended but the brutalities of racial prejudice persisted. During Reconstruction, new attempts to ensure civil and political rights were resisted through terror, racial violence, and systemic denial of justice. Well into the twentieth century, segregation persisted, but years of individual and mobilized protest finally led to significant reform. Organizations such as the NAACP provided vital support. Before efforts to disenfranchise the black vote became successful, some politicians even courted black voters to further their own political agendas. African Americans in Central Texas History is a rare source that sheds light on the African American experience in the heart of the state.

The Last 100 Yards: The Crucible of Close Combat in Large-Scale Combat Operations presents thirteen historical case studies

of close combat operations from World War I through Operation Iraqi Freedom. This volume is a collection from the unique and deliberate perspective of the last 100 yards of ground combat. In today's Army, there are few leaders who have experienced multi-domain large-scale ground combat against a near-peer or peer enemy first hand. This volume serves to augment military professionals' understanding of the realities of large-scale ground combat operations through the experiences of those who lived it.

The U.S. Army Center of Military History recently published a new pamphlet in its U.S. Army Campaigns of the Vietnam War series, Transition, November 1968-December 1969, by Adrian G. Traas. The author discusses the gradual reduction of the U.S. Army's involvement in Vietnam that began after Richard M. Nixon was elected president in November 1968. Even as U.S. and South Vietnamese forces battled an increasingly-elusive enemy, Army officials stepped up efforts to create a South Vietnamese military strong enough to defend their nation with only minimal support from American troops. In the spring of 1969, President Nixon announced his plan for the phased withdrawal of U.S. forces from South Vietnam, a policy quickly dubbed "Vietnamization." As the American public's support for the war continued to erode, U.S. military leaders spent the remainder of 1969 preparing for further troop reductions and the inevitable turnover of bases and equipment to South Vietnamese forces.
