Fire in the Minds of Men
KTAV Publishing House, Inc.
In almost every military intervention in its history, the US has made cultural mistakes that hindered attainment of its policy goals. From the strategic bombing of Vietnam to the accidental burning of the Koran in Afghanistan, it has blundered around with little consideration of local

cultural beliefs and for the long-term effects on the host nation's society. Cultural anthropology--the so-called "handmaiden of colonialism"--has historically served as an intellectual bridge between Western powers and local nationals. What light can it shed on the intersection of the US military and foreign societies today? This book tells the story of anthropologists who worked directly for the military, such as Ursula Graham Bower, the only woman to hold a British combat command during WWII. Each faced challenges including the negative outcomes of exporting Western political models and errors of perception. Ranging from the British colonial era in Africa to the recent wars in Iraq and Afghanistan, Military Anthropology illustrates the conceptual, cultural and practical barriers encountered by military organisations

different from their own. Accelerating Decarbonization of the U.S. Energy System Oxford [England] : Clarendon Press ; Oxford ; New York : Oxford University Press

Marihuana
CreateSpace
Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (Cannabis sativa). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb

that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass-the list is endless. Formally christened Cannabis sativa in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition. Religious Warfare in Europe 1400-1536 Simon

Religious warfare
has been a recurrent
feature of European
history. In this
intelligent and
readable study, the
distinguished
Crusade historian
Norman Housley
describes and
analyses the
principal
expressions of holy
war in the period
from the Hussite
wars to the first
generation of the
Reformation. The
context was one of
both challenge and
expansion. The
Ottoman Turks posed

an unprecedented external threat to the 'Christian republic', while doctrinal dissent, constant warfare between states, and rebellion eroded it from within.

Professor Housley shows how in these circumstances the propensity to sanctify warfare took radically different forms. At times warfare between national communities was shaped by convictions of 'sacred patriotism', either in defending God-given native land or in the pursuit of messianic programmes abroad.

Insurrectionary activity, especially when driven by apocalyptic

expectations, was a second important type of religious war. In the 1420s and early 1430s the Hussites waged war successfully in defence of what they believed to be 'God's Law'. And some frontier communities depicted their struggle against non-believers as religious war by reference to crusading ideas and habits of thought. Professor Housley pinpoints what these conflicts had in common in the ways the combatants perceived their own role, their demonization of their opponents, and the ongoing critique of religious war in all its forms. This is a

major contribution to body other than the both Crusade history Earth. The event and the study of the remains one of Wars of Religion of mankind's greatest the early modern achievements and was period. Professor witnessed by the Housley explores the largest worldwide interaction between television audience Crusade and religious in history. In the war in the broader years since, millions sense, and argues more have had their that the religious earth-centric violence of the perspective changed sixteenth and forever by gazing at seventeenth centuries the iconic photograph was organic, in the of Aldrin standing on sense that it sprang the surface of the from deeply rooted Moon with the proclivities within blackness of space European society. behind him. He *Military* described what he saw as 'magnificent *Anthropology* desolation'. The Columbia University flight of Apollo 11 Press made Aldrin one of Forty years ago, the most famous Buzz Aldrin became people on the planet, the second human - yet few people know minutes after Neil the rest of the Armstrong - to set the rest of the foot on a celestial story. In *Magnificent*

Desolation, Aldrin not only gives us a harrowing first-person account of the lunar landing that came within seconds of failure, as well as the ultimate insider's view of life as one of the superstars of America's space program, he also opens up with remarkable candor about his more personal trials - and eventual triumphs - back on Earth. From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the Moon before the decade was out, Aldrin returned home to an Air Force career stripped of purpose or direction,

other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour. The twin demons of depression and alcoholism emerged - the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him. As an adventure story, a searing memoir of self-destruction and self-renewal, and as a visionary rallying cry to once again set our course for Mars and beyond, *Magnificent Desolation* is the thoroughly human story of a genuine hero. **Men in Families and**

Family Policy in a Changing World CRC Press

This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His

historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905,

March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared *The New Republic* hailed it as "remarkable, learned and lively," while *The New Yorker* noted that Billington "pays great attention to the lives and emotions of individuals and this

makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life. *Governing the Ungovernable* United Nations Publications Today many view Sigmund Freud as an elitist whose psychoanalytic treatment was reserved for the intellectually and financially advantaged. However, in this new work Elizabeth Ann Danto presents a strikingly different picture of Freud and the early psychoanalytic movement. Danto recovers the neglected history of Freud and other analysts' intense

social activism and traditions. Between their commitment to 1920 and 1938 and in treating the poor and ten different cities, working classes. they created Danto's narrative outpatient centers begins in the years that provided free following the end of mental health care. World War I and the They believed that fall of the Habsburg psychoanalysis would Empire. Joining with share in the the social democratic transformation of and artistic civil society and movements that were that these new sweeping across outpatient centers Central and Western would help restore Europe, analysts such people to their as Freud, Wilhelm inherently good and Reich, Erik Erikson, productive selves. Karen Horney, Erich Drawing on oral Fromm, and Helene histories and new Deutsch envisioned a archival material, new role for Danto offers vivid psychoanalysis. These portraits of the psychoanalysts saw movement's central themselves as brokers figures and their of social change and beliefs. She explores viewed psychoanalysis the successes, as a challenge to failures, and conventional challenges faced by political and social free institutes such

as the Berlin Poliklinik, the Vienna Ambulatorium, and Alfred Adler's child-guidance clinics. She also describes the efforts of Wilhelm Reich's Sex-Pol, a fusion of psychoanalysis and left-wing politics, which provided free counseling and sex education and aimed to end public repression of private sexuality. In addition to situating the efforts of psychoanalysts in the political and cultural contexts of Weimar Germany and Red Vienna, Danto also discusses the important treatments and methods developed during this period, including child analysis, short-term therapy, crisis intervention, task-centered treatment, active therapy, and clinical case presentations. Her work illuminates the importance of the social environment and the idea of community to the theory and practice of psychoanalysis.

The world is transforming its energy system from one dominated by fossil fuel combustion to one with net-zero emissions of carbon dioxide (CO₂), the primary anthropogenic greenhouse gas. This energy transition is critical to mitigating climate change, protecting human health, and revitalizing the U.S.

economy. To help policymakers, businesses, communities, and the public better understand what a net-zero transition would mean for the United States, the National Academies of Sciences, Engineering and Medicine convened a committee of experts to investigate how the U.S. could best decarbonize its transportation, electricity, buildings, and industrial sectors. This report, *Accelerating Decarbonization of the United States Energy System*, identifies key technological and socio-economic goals that must be achieved to put the United States on the path to reach net-zero carbon emissions by 2050. The report presents a

policy blueprint outlining critical near-term actions for the first decade (2021-2030) of this 30-year effort, including ways to support communities that will be most impacted by the transition. *America's Forgotten Colony* Oxford University Press
The primary purpose of the *Manual of Classification of Motor Vehicle Traffic Accidents* is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one

containing definitions and one containing classification instructions.

On 3 January 1991, Aryeh Levin raised the flag over the Israeli consulate in Moscow for the first time in 24 years. Mr. Levin's sojourn in a hostile Russian capital from 1988 to the presentation of his credentials in 1991 takes place against a background of earthshaking events. His four-year tenure is a struggle to establish Soviet-Israeli relations on a solid footing and to facilitate the immigration of almost half a million Russian Jews. It is also a battle against misconceptions and

narrow-mindedness on both sides. Mr. Levin's story is inextricably entwined with the process of reform and eventual collapse of the Soviet Union. An intimate knowledge of Russian and Middle Eastern politics gained from years of service in military intelligence and in the Israeli Foreign Ministry, and his fluent command of Russian, make Mr. Levin an acute observer of the workings of the Soviet system and the Russian character. His memoir provides candid portraits of leading public figures, both Russian and Israeli, including Mikhail Gorbachev, Boris Yeltsin, Eduard Shevardnadze, Shimon Peres, David Levy and Yitzhak Shamir.

"The perceptions of the role of women and men in families have changed over the past few decades. Men are no longer perceived as the economic providers to families. The role of men in the family has undergone many "diverse demographic, socio-economic and cultural transformations" impacting the formation, stability and overall well-being of families. In light of this

development, DESA's Division for Social Policy and Development (DSPD) launched a new publication on "Men in Families and Family Policy in a Changing World" on 17 February focusing on the shifting roles and views of men in families."--Provided by publisher.

The Geneva Conventions are the best-known and longest-established laws governing warfare, but what

difference do they make to how states engage in armed conflict? Since the start of the "War on Terror" with 9/11, these protocols have increasingly been incorporated into public discussion. We have entered an era where contemporary wars often involve terrorism and guerrilla tactics, but how have the rules that were designed for more conventional forms of interstate violence adjusted? Do the Geneva Conventions Matter? provides a rich, comparative analysis of the

laws that govern warfare and a more specific investigation relating to state practice. Matthew Evangelista and Nina Tannenwald convey the extent and conditions that symbolic or "ritual" compliance translates into actual compliance on the battlefield by looking at important studies across history. To name a few, they navigate through the Algerian War for independence from France in the 1950s and 1960s; the US wars in Korea, Vietnam, Iraq, and Afghanistan;

Iranian and Israeli approaches to the laws of war; and the legal obligations of private security firms and peacekeeping forces. Thoroughly researched, this work adds to the law and society literature in sociology, the constructivist literature in international relations, and legal scholarship on "internalization." Do the Geneva Conventions Matter? gives insight into how the Geneva regime has constrained guerrilla warfare

and terrorism and the factors that affect protect human rights in wartime.

Environmental Chemistry, Seventh Edition Ignatius Press

Everything you need to know about your Android smartphone?in full color! Eager to learn the ins and outs of your exciting, new Android phone? Then this is the book you need! Written in the typical fun and friendly For Dummies style, this full-color guide covers the basics of all the features of Android phones without weighing you down with heavy technical terms or

jargon. Veteran world-renowned author Dan Gookin walks you through everything from getting started with setup and configuration to making the most of your phone's potential with texting, e-mailing, accessing the Internet and social networking sites, using the camera, synching with a PC, downloading apps, and more. Covers all the details of the operating system that applies to every Android phone, including Motorola Droids, HTC devices, Samsung Galaxy S phones, to name a few. Walks you through basic phone operations while also encouraging you to

explore your phone's full potential. Serves as an ideal guide to an inexperienced Android newbie who is enthusiastic about getting a handle on everything an Android phone can do. *Android Phones For Dummies* helps you get smarter with your Android smartphone. Block by Block OUP Oxford. First published by the Combat Studies Institute Press. The resulting anthology begins with a general overview of urban operations from ancient times to the midpoint of the twentieth century. It then details ten specific case studies of U.S.,

German, and Japanese operations in cities during World War II and ends with more recent Russian attempts to subdue Chechen fighters in Grozny and the Serbian siege of Sarajevo.

Operations range across the spectrum from combat to humanitarian and disaster relief. Each chapter contains a narrative account of a designated operation, identifying and analyzing the lessons that remain relevant today.

Magnificent Desolation

Lulu Press, Inc
Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries

and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity. *Tome of Magic* Hachette UK

This 5th ed. is an update and expansion of the 1989 4th ed. This EPA manual provides health

professionals with information on the health hazards of pesticides currently in use, and current consensus recommendations for management of poisonings and injuries caused by them. As with previous updates, this new ed. incorporates new pesticide products that are not necessarily widely known among health professionals.

Contents: (1) General Information; Introduction; General Principles in the Management of Acute Pesticide Poisonings; Environmental and Occupational History; (2) Insecticides; (3) Herbicides; (4) Other Pesticides; (5) Index of Signs and Symptoms; Index of Pesticide Products. Charts and tables.
