A leading economic historian traces the evolution of American capitalism from the colonial era to the present—and argues that we’ve reached a turning point that will define the era ahead. “A monumental achievement, sure to become a classic.” —Zachary D. Carter, author of *The Price of Peace* In this ambitious single-volume history of the United States, economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country’s economic evolution is inseparable from the nature of

American life itself. The Age of Commerce spans the colonial era through the outbreak of the Civil War, and the Age of Capital traces the lasting impact of the industrial revolution. The volatility of the Age of Capital ultimately led to the Great Depression, which sparked the Age of Control, during which the government took on a more active role in the economy, and finally, in the Age of Chaos, deregulation and the growth of the finance industry created a booming economy for some but also striking inequalities and a lack of oversight that led directly to the crash of 2008. In *Ages of American Capitalism*, Levy proves that capitalism in the United States has never been just one thing. Instead, it has morphed through the country’s history—and it’s likely changing again right now. “A stunning accomplishment . . . an indispensable guide to understanding American history—and what’s happening in today’s economy.” —*Christian Science Monitor* “The best one-volume history of American capitalism.” —Sven Beckert, author of *Empire of Cotton*

The Souls of Black Folk W. E. B. Du Bois - One of the Most Important Books on Civil Rights, Race, and Freedom Ever

Written. It is a seminal work in the history of sociology and a cornerstone of African-American literature and a monumental collection of essays that examines race and racism in America during the early 1900s and prior. To develop this work, Du Bois drew from his own experiences as an African American in American society. Outside of its notable relevance in African-American history, *The Souls of Black Folk* also holds an important place in social science as one of the early works in the field of sociology. *The Souls of Black Folk* is perfect for anyone interested in African-American literature and history

The New York Times bestseller: "You gotta read this. It is the most exciting book about Pluto you will ever read in your life." —Jon Stewart When the Rose Center for Earth and Space at the American Museum of Natural History reclassified Pluto as an icy comet, the New York Times proclaimed on page one, "Pluto Not a Planet? Only in New York." Immediately, the public, professionals, and press were choosing sides over Pluto's planethood. Pluto is entrenched in our cultural and emotional view of the cosmos, and Neil deGrasse Tyson, award-winning author and director of the Rose Center, is on a quest to discover why. He stood at the heart of the controversy over Pluto's demotion, and consequently Plutophiles have freely shared their opinions with him, including endless hate mail from

third-graders. With his inimitable wit, Tyson delivers a minihistory of planets, describes the oversized characters of the people who study them, and recounts how America's favorite planet was ousted from the cosmic hub.

Interpreting the Great Awakening of the eighteenth century was in large part the work of Jonathan Edwards; whose writings on the subject defined the revival tradition in America. Moving from sensitive descriptions of "the Surprising work of God" in conversion to a consuming quest for the essence of true religion, and threading his way through mounting controversies over "errors in doctrine and disorders in practice," Edwards sought to locate an authentic core of evangelical experience, to define it in terms of biblical faith and psychological insight, and to defend it against both overheated zealous and rationalistic critics. The tracts that unfold his thoughts, presented here (with related correspondence) for the first time in accurate critical texts, document a movement so significant for the American character that it has been called "our national conversion." In a carefully researched introduction, C.C. Goen identifies the "Arminian threat" to which the Northampton pastor responded at the onset of the Awakening, and traces Edwards' understanding of vital religion as it developed in the ambiguous context of revivalism. Mr. Goen's study also illuminates little-known aspects of *A Faithful Narrative* and describes the haphazard way in which that important work reached its eager audience. C.C. Goen, author of

Revivalism and Separatism in New England, 1740-1800 (1962), is professor of church history at the Wesley Theological Seminary in Washington, D.C.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American

Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Ages of American Capitalism Univ of California Press

The Jungle is a 1906 novel written by the American journalist and novelist Upton Sinclair (1878 – 1968). Sinclair wrote the novel to portray the lives of immigrants in the United States in Chicago and similar industrialized cities. Many readers were most concerned with his exposure of health violations and unsanitary practices in the American meatpacking industry during the early 20th century, based on an investigation he did for a socialist newspaper. The book depicts working class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many

workers. These elements are contrasted with the deeply rooted corruption of people in power. A review by the writer Jack London called it, "the Uncle Tom's Cabin of wage slavery." Sinclair was considered a muckraker, or journalist who exposed corruption in government and business. He first published the novel in serial form in 1905 in the Socialist newspaper, *Appeal to Reason*, between February 25, 1905, and November 4, 1905. In 1904, Sinclair had spent seven weeks gathering information while working incognito in the meatpacking plants of the Chicago stockyards for the newspaper. It was published as a book on February 26, 1906 by Doubleday and in a subscribers' edition.

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of

the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.
