"It was September 1776 and the American colonies had just declared independence from the British. But General George Washington knew things were not going the Americans' way. When Gen. Washington needed someone to spy on the British, only one young man volunteered. That man was Nathan Hale, an early American hero."--

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the

framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

People's History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, A People's History is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, A People's History of the United States, which was nominated for the American Book Award in 1981, features insightful

analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

Impoverished young Americans had no greater champion during the Depression than Eleanor Roosevelt. As First Lady, Mrs. Roosevelt used her newspaper columns and radio broadcasts to crusade for expanded federal aid to poor children and teens. She was the most visible spokesperson

---

for the National Youth Administration, the New Deal's central agency for aiding needy youths, and she was adamant in insisting that federal aid to young people be administered without discrimination so that it reached blacks as well as whites, girls as well as boys. This activism made Mrs. Roosevelt a beloved figure among poor teens and children, who between 1933 and 1941 wrote her thousands of letters describing their problems and requesting her help. Dear Mrs. Roosevelt presents nearly 200 of these extraordinary documents to open a window into the lives of the Depression's youngest victims. In their own words, the letter writers confide what it was like to be needy and young during the worst economic crisis in American history. Revealing both the strengths and the limitations of New Deal liberalism, this book depicts an administration concerned and caring enough to elicit such moving appeals for help yet unable to respond in the very personal ways the letter writers hoped.

The Civil Rights Movement in Mississippi

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in

practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an

---

accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research-the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies,

and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.

Based on new research and combining multiple scholarly approaches, these twelve essays tell new stories about the civil rights

movement in the state most resistant to change. Wesley Hogan, Françoise N. Hamlin, and Michael Vinson Williams raise questions about how civil rights organizing took place. Three pairs of essays address African Americans' and whites' stories on education, religion, and the issues of violence. Jelani Favors and Robert Luckett analyze civil rights issues on the campuses of Jackson State University and the University of Mississippi. Carter Dalton Lyon and Joseph T. Reiff study people who confronted the question of how their religion related to their possible involvement in civil rights activism. By studying the Ku Klux Klan and the Deacons for Defense in Mississippi, David Cunningham and Akinyele Umoja ask who chose to use violence or to raise its possibility. The final three chapters describe some of the consequences and continuing questions raised by the civil rights movement. Byron D'Andra Orey analyzes the

---

degree to which voting rights translated into political power for African American legislators. Chris Myers Asch studies a Freedom School that started in recent years in the Mississippi Delta. Emilye Crosby details the conflicting memories of Claiborne County residents and the parts of the civil rights movement they recall or ignore. As a group, the essays introduce numerous new characters and conundrums into civil rights scholarship, advance efforts to study African Americans and whites as interactive agents in the complex stories, and encourage historians to pull civil rights scholarship closer toward the present.

*Dear Mrs. Roosevelt* B.E.S. Publishing Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training,

---

widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women

in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and

---

overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)
