Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and

the ways that our decisions can have consequences for others.

NEW YORK TIMES BESTSELLER • In the final book of his astonishing career, Carl Sagan brilliantly examines the burning questions of our lives, our world, and the universe around us. These luminous, entertaining essays travel both the vastness of the cosmos and the intimacy of the human mind, posing such fascinating questions as how did the universe originate and how will it end, and how can we meld science and compassion to meet the challenges of the coming century? Here, too, is a rare, private glimpse of Sagan ' s thoughts about love, death, and God as he struggled with fatal disease. Ever forward-looking and vibrant with the sparkle of his unquenchable curiosity, *Billions & Billions* is a testament to one of the great scientific minds of our day. Praise for *Billions & Billions* “ [Sagan ' s] writing brims with optimism, clarity and compassion. ” —Ft. Lauderdale Sun-Sentinel

“ Sagan used the spotlight of his fame to illuminate the abyss into which stupidity, greed, and the lust for power may yet dump us. All of those interests and causes are handsomely represented in *Billions & Billions*. ” —The Washington Post Book World

“ Astronomer Carl Sagan didn ’ t live to see the millennium, but he probably has done more than any other popular scientist to prepare us for its arrival. ” —Atlanta Journal & Constitution

“ *Billions & Billions* can be interpreted as the Silent Spring for the current generation. . . . Human history includes a number of leaders with great minds who gave us theories about our universe and origins that ran contrary to religious dogma. Galileo determined that the Earth revolved around the Sun, not the other way around. Darwin challenged Creationism with his *Evolution of Species*. And now, Sagan has given the world its latest challenge: *Billions & Billions*. ” —San Antonio Express-News

“ [Sagan ’ s] inspiration and boundless curiosity live on in the gift of his work. ” —Seattle Times & Post-Intelligencer

“ Couldn ’ t stay awake in your high school science classes? This book can help fill in the holes. Acclaimed scientist Carl Sagan combines his logic and knowledge with wit and humor to make a potentially dry subject enjoyable to read. ” —The Dallas Morning News

Sequential Experimentation in Clinical Trials Harvard University Press

“ Toor ’ s style is friendly, funny, and genuinely compelling, exhorting students to go deeper with their writing even (and especially) when the stakes are high. ” —School Library Journal

Writing, for most of us, is bound up with anxiety. It ’ s even worse when it feels like your whole future—or at least where you ’ ll spend the next four years in college—is on the line. It ’ s easy to understand why so many high school seniors put off working on their applications until the last minute or end up with a generic and clichéd essay. The

good news? You already have the “secret sauce” for crafting a compelling personal essay: your own experiences and your unique voice. The best essays rarely catalog how students have succeeded or achieved. Good writing shows the reader how you’ve struggled and describes mistakes you’ve made. Excellent essays express what you’re fired up about, illustrate how you think, and illuminate the ways you’ve grown. More than twenty million students apply to college every year; many of them look similar in terms of test scores, grades, courses taken, extracurricular activities. Admissions officers wade through piles of files. As an applicant, you need to think about what will interest an exhausted reader. What can you write that will make her argue to admit you instead of the thousands of other applicants? A good essay will be

conversational and rich in vivid details, and it could only be written by one person—you. This book will help you figure out how to find and present the best in yourself. You’ll acquire some useful tools for writing well—and may even have fun—in the process.

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with

nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on

William's story, this is the perfect edition to read and share with the whole family.

Grounded in intimate moments of family life in and out of hospitals, this book explores the hope that inspires us to try to create lives worth living, even when no cure is in sight. The Paradox of Hope focuses on a group of African American families in a multicultural urban environment, many of them poor and all of them with children who have been diagnosed with serious chronic medical conditions. Cheryl Mattingly proposes a

narrative phenomenology of practice as she explores case stories in this highly readable study. Depicting the multicultural urban hospital as a border zone where race, class, and chronic disease intersect, this theoretically innovative study illuminates communities of care that span both clinic and family and shows how hope is created as an everyday reality amid trying circumstances.

This book explores the ways that disciplinary convergence and technological advance are transforming systems engineering to address gaps in complex systems engineering: Transdisciplinary Systems Engineering (TSE). TSE reaches beyond traditional disciplines to find connections—and this book examines a range of new methods from across such disparate areas of scholarship as computer science, social science, human studies, and systems design to reveal patterns, efficiencies,

affordances, and pathways to intuitive design. Organized to serve multiple constituencies, the book stands as an ideal textbook supplement for graduate courses in systems engineering, a reference text for program managers and practicing engineers in all industries, and a primary source for researchers engaged in multidisciplinary research in systems engineering and design.

Each year, hundreds of thousands of high school seniors compete in a game they ' ll play only once, whose rules they do not fully understand, yet whose consequences are enormous. The game is college admissions, and applying early to an

elite school is one way to win. But the early admissions process is enigmatic and flawed. It can easily lead students toward hasty or misinformed decisions. This book—based on the careful examination of more than 500,000 college applications to fourteen elite colleges and hundreds of interviews with students, counselors, and admissions officers—provides an extraordinarily thorough analysis of early admissions. In clear language it details the advantages and pitfalls of applying early as it provides a map for students and parents to navigate the process. Unlike college admissions guides, *The Early*

Admissions Game reveals the realities of early applications, how they work and what effects they have. The authors frankly assess early applications. Applying early is not for everyone, but it will improve—sometimes double, even triple—the chances of being admitted to a prestigious college. An early decision program can greatly enhance a college's reputation by skewing statistics, such as selectivity, average SAT scores, or percentage of admitted applicants who matriculate. But these gains come at the expense of distorting applicants' decisions and providing disparate treatment of students who

apply early and regular admissions. The system, in short, is unfair, and the authors make recommendations for improvement. The Early Admissions Game is sure to be the definitive work on the subject. It is must reading for admissions officers, guidance counselors, and high school seniors and their parents.

A memoir about showbiz in the early 20th century that travels from the theaters of Vienna, Prague, and Berlin, to Hollywood during the golden age, complete with encounters with Franz Kafka, Albert Einstein, and Greta Garbo along the way.

Salka Viertel ' s autobiography tells of a brilliant, creative, and well-connected woman ' s pilgrimage through the darkest years of the twentieth century, a journey that would take her from a remote province of the Austro-Hungarian Empire to Hollywood. The Kindness of Strangers is, to quote the New Yorker writer S. N. Behrman, " a very rich book. It provides a panorama of the dissolving civilizations of the twentieth century. In all of them the author lived at the apex of their culture and artistic aristocracies. Her childhood . . . is an entrancing idyll. In Berlin, in Prague, in Vienna, there appears Karl Kraus, Kafka, Rilke, Robert Musil, Schoenberg, Einstein, Alban Berg. There is the suffering and disruption of the First World War and the suffering and agony after it, which is described with such intimacy and vividness that you endure

these terrible years with the author. Then comes the migration to Hollywood, where Salka ' s house on Maybery Road becomes a kind of Pantheon for the gathered artists, musicians, and writers. It seems to me that no one has ever described Hollywood and the life of writers there with such verve. "

Now a New York Times bestseller and from the author of *The Psychopath Test*, a captivating and brilliant exploration of one of our world's most underappreciated forces: shame. 'It's about the terror, isn't it?' 'The terror of what?' I said. 'The terror of being found out.' For the past three years, Jon Ronson has travelled the world meeting recipients of high-profile public shamings. The shamed are people like us - people who, say, made a joke on social media that came out badly, or made a mistake at work. Once their transgression is revealed, collective outrage circles with the force of a hurricane and the next thing they know they're being torn apart by

an angry mob, jeered at, demonized, sometimes even fired from their job. A great renaissance of public shaming is sweeping our land. Justice has been democratized. The silent majority are getting a voice. But what are we doing with our voice? We are mercilessly finding people's faults. We are defining the boundaries of normality by ruining the lives of those outside it. We are using shame as a form of social control. Simultaneously powerful and hilarious in the way only Jon Ronson can be, *So You've Been Publicly Shamed* is a deeply honest book about modern life, full of eye-opening truths about the escalating war on human flaws - and the very scary part we all play in it. *Dig Your Well before You're Thirsty*

Fifty years ago, the National Academy of Engineering (NAE) was founded by the stroke of a pen when the National Academy of Sciences Council approved the NAE's articles of organization. *Making a World of Difference* commemorates the NAE anniversary with a collection of essays that highlight the prodigious changes in people's lives that have been created by engineering over the past half century and consider how the future will be similarly shaped. Over the past 50 years, engineering has transformed our lives literally every day, and it will continue to do so going forward,

utilizing new capabilities, creating new applications, and providing ever-expanding services to people. The essays of Making a World of Difference discuss the seamless integration of engineering into both our society and our daily lives, and present a vision of what engineering may deliver in the next half century.
