The Dennis

company has been building vehicles since 1895, making it the oldest continuously producing British manufacturer. From its origins in a small Guildford shop, the company has grown to become a major bus manufacturer with its products selling around the world. This book discusses the company's highs and lows, through two world wars, challenging markets and ownership changes. It documents the

vehicles produced and their innovative design features, from early cars and street-cleaning machines to vans, buses, trucks, fire engines and ambulances. First-hand descriptions of how, and why, some of the company's most successful products such as the Dart, Trident and Enviro buses evolved. It explains why their once market-leading fire engines are no longer made. It also analyses the

reasons why some products were less successful and explores what happened to parts of the company that were sold over the years. Finally, the company's future opportunities and challenges are considered. The author, Andy Goundry, has not only drawn on his own personal experience of almost twenty years of employment with the company but he has drawn on what is left of the company archives, private

collections and first-hand accounts, to produce this book as a salutation of over 125 years of continuous manufacturing. Dennis Buses and Other Vehicles Sheridan House, Inc. Sell Up and Cruise the Inland Waterways A&C Black Diesel Progress Engines & Drives The Crowood Press A wealth of practical information for anyone dreaming of cruising inland

waterways. Diesel Engineering CRC Press John Kretschmer is a professional delivery skipper with over 200,000 bluewater miles. The Oil Engine and Gas Turbine Voyage Press The success of the previous Conferences on Energy from Biomass, held in Brighton 1980 and Berlin 1982, and the continued interest among European countries, encouraged the Commission of the European Communities to organise the third conference on this area of energy production. It

brought together about 500 experts from many countries thus presenting an international forum for discussion of the most recent advances in research and development, manufacture and industrial applications. **Annual Transportation Convention A&C Black** Plymouth 1946-1959 By Jim Benjaminson.
