An entire volume dedicated to detailing and preserving the iconic muscle car dealerships of the 1960s and early 1970s, many whose doors are now closed. Text is supported with more than 350 historic photos and illustrations. Muscle car historian Duncan Brown revisits this glorious automotive era when Nickey 427 Camaros and supercharged Dodge Demons by Grand Spaulding Dodge terrorized the streets. Drag sponsored cars from Reynolds Buick, Yeakel Chrysler-Plymouth, and Mel Burns Ford informed buyers that if you came to their dealership, you too could have a screaming fast muscle car just like the ones you saw at the dragstrip. It was these dealerships that created the lasting muscle car legacy through their innovative advertising and over-the-top performance. The majority of these dealerships floundered, unable to re-attract the customers they had prior to the muscle car. Thankfully, a volume has been dedicated to preserving the history of those less fortunate and revisiting the past success of these Lost Muscle Car Dealerships.

The heart-pounding story of an unlikely band of ragtags who took on Hitler's Grand Prix driver. In the years before World War II, Adolf Hitler wanted to prove the greatness of the Third Reich in everything from track and field to motorsports. The Nazis poured money into the development of new race cars, and Mercedes-Benz came out with a stable of supercharged automobiles called Silver Arrows. Their drivers dominated the sensational world of European Grand Prix racing and saluted Hitler on their many returns home with victory. As the Third Reich stripped Jews of their rights and began their march toward war, one driver, Ren é Dreyfus, a 32-year-old Frenchman of Jewish heritage who had enjoyed some early successes on the racing circuit, was barred from driving on any German or Italian race teams, which fielded the best in class, due to the rise of Hitler and Benito Mussolini. So it was that in 1937, Lucy Schell, an American heiress and top Monte Carlo Rally driver, needed a racer for a new team she was creating to take on Germany's Silver Arrows. Sensing untapped potential in Dreyfus, she funded the development of a nimble tiger of a new car built by a little-known French manufacturer called Delahaye. As the nations of Europe marched ever closer to war, Schell and Dreyfus faced down Hitler's top drivers, and the world held its breath in anticipation, waiting to see who would triumph.

Describing Discourse Edmunds Publications

Ford's 351 Cleveland was designed to be a 'mid-sized' V-8 engine, and was developed for higher performance use upon its launch in late 1969 for the 1970 models. This unique design proved itself under the hood of Ford's Mustang, among other high performance cars. The Cleveland engine addressed the major shortcoming of the Windsor engines that preceded it, namely cylinder head air flow. The Windsor engines just couldn't be built at the time to compete effectively with the strongest GM and Mopar small blocks offerings, and the Cleveland engine was the answer to that problem.

Unfortunately, the Cleveland engine was introduced at the end of Detroit's muscle car era, and the engine, in pure Cleveland form, was very short lived. It did continue on as a low compression passenger car and truck engine in the form of the 351M and 400M, which in their day, offered little in the way of excitement. Renewed enthusiasm in this engine has spawned an influx of top-quality new components that make building or modifying these engines affordable. This new book reviews the history and variations of the 351 Cleveland and Ford's related engines, the 351M and 400M. Basic dimensions and specifications of each engine, along with tips for identifying both design differences and casting number(s) are shown. In addition to this, each engine's strong points and areas of concern are described in detail. Written with high performance in mind, both traditional power tricks and methods to increase efficiency of these specific engines are shared. With the influx of aftermarket parts, especially excellent cylinder heads, the 351 Cleveland as well as the 351M and 400M cousins are now seen as great engines to build. This book will walk you through everything you need to know to build a great street or competition engine based in the 351 Cleveland platform.
