Smartphones are getting a
little boring. All of the top
devices have roughly the same
features and specs.
Manufacturers are trying
harder than ever to
differentiate their devices. The
display has become an area of

not talking about pixels. More
and more devices are getting

curved displays, and one of the
best entries is the LG G Flex 2.
We ' re at a point where many
people consider curved displays
to be nothing more than a
gimmick. Manufacturers keep
trying to find valuable uses, but
so far no one has made a
compelling case for why you
need a curved display. LG has
taken a much different
approach. The G Flex 2 is not
full of gimmicky features and
silly widgets. It ' s all about
comfort, and that might be the
best reason yet for curved
