A user guide, also commonly called a technical communication document or manual, is intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies. User guides are most commonly associated with electronic goods, computer hardware and software, although they can be written for any product. Most user guides contain

User Guide Manual For Software

Software Applications for professional and creative lay- out and design For publications and manuals, the most preferred options are "Adobe InDesign", "Adobe Pagemaker" and "Quark QuarkXPress" and the like. These applications have functionality and features that would take time to learn and get used to.

Often filled with jargon, acronyms, and directions that require a Ph.D to understand, software user manuals are sometimes written from the point of view of a developer rather than a user. As a result, the

guide may make assumptions about the reader's skill level that are often incorrect. The first step in writing a good user manual is to get the actual writing process as far away from the engineers as possible.
