Nikon D5300 Digital Field Guide John Wiley & Sons Digital SLR cameras have made it easier than ever before to photograph the night sky. Whether you're a beginner, nature photographer, or serious astronomer, this is the definitive handbook to capturing the heavens. Starting with simple projects for beginners such as cameras on tripods, it then moves onto more advanced projects including telescope photography and methods of astronomical research. With 80% revised and updated material, this new edition covers nightscapes, eclipses, using cameras with sky trackers and telescopes, and tools for identifying celestial objects and investigating them scientifically. Image processing is discussed in detail, with worked examples from three popular software packages - Nebulosity, MaxIm DL, and PixInsight. Rather than taking a recipe-book approach,

Covington explains how your equipment works as well as offering advice on many practical considerations, such as choice of set-up and the testing of lenses, making this a comprehensive guide for anyone involved in astrophotography.

Larry Singer's book on the Bonnet House inspires readers to create their own nature photo safaris. Each chapter of the book features examples of the fine art nature photography Larry has produced on the grounds of the Bonnet House Museum and Garden in Fort Lauderdale, Florida. Singer explains the techniques he uses to provide image viewers with a sense of location, document the nature found there, and create fine art photographic images. Each chapter features extraordinary examples of fine art nature photography, along with full technical data for each image.

Techniques for photographing birds, reptiles, insects, flowers, and miscellaneous plants are each presented in a separate chapter in the book. Singer also explains how quality images can be made using inexpensive equipment—a point that he proves repeatedly in showing readers just how he used his gear to create outstanding images.
