Moving beyond simplistic equipment lists, this book provides contextual and practical information to help academic library personnel learn how to plan, collaborate, and sustain relevant makerspaces positioned within the broader ecology of campus innovation. The makerspace movement within academic libraries has largely focused on providing space and equipment for making. Academic libraries, however, have a unique opportunity to push beyond the 3D printer to create makerspaces that complement the broader ecology of innovation happening on campus. Intended for academic library personnel, this book is for those seeking guidance on how to establish a makerspace that is more than an equipment room. Katy Mathews and Daniel Harper provide important context for the maker movement, a review of the process of making, and an overview of the various types of makerspaces, including the hub-and-spoke model, the centralized model, and the mobile makerspace. Additionally, the book provides practical steps to consider, including situating the academic library makerspace within the campus environment, creating valuable collaborations on campus, finding innovative ways to support the entire making process, programming, curriculum planning, and sustaining daily operations such as staffing, funding, and public service.

This helpful book provides practical insight into the work and environment of reference services in the humanities. Librarian's mental maps of humanities reference materials must include an awareness of the metaphoric, not too precise nature of many patrons' queries. Reference Services in the Humanities discusses the structure of literature in the humanities and how it matches or challenges mental images of the field. Chapters are infused with the issues of language, names, and meaning within a metaphoric genre. The book serves as a guide to humanist's use of metaphoric language and also as a bibliography of sources. Reference Services in the Humanities contains specific references for finding materials in areas that are not traditional, mainstream arts. This sample of disciplines provides case studies depicting each field's particular idiosyncrasies. Chapters examine the challenge of referral reference and common problems encountered in searching for answers to patrons' questions. The book contains a theoretical framework for interacting with patrons and addresses options for humanities reference in an electronic age. This book brings together librarians and researchers who provide and manage reference services to a wide array of disciplines within the humanities. Authors come from all types of libraries and represent a broad spectrum of patrons, from the young student curious about the movies to practicing musicians and craftspeople. This diversity provides an informative grounding for practitioners and library school students and faculty who wish to become effective reference librarians in the future. Reference Services in the Humanities is divided into four sections which address research questions and challenges in selected disciplines, descriptions from the field, political issues in the humanities, and theories and ideas for the future. Specific topics explored include access to special collections, censorship, library resources for theater artists, history research, vocabulary control, labeling of minorities, craft information sources, and much more.

The Use and Abuse of Police Power in America University of Chicago Press

Providing a timely and much-needed investigation of how U.S. law enforcement carries out its public safety and crime fighting mandates, this book is an invaluable resource for students, educators, and concerned citizens. Does America face an epidemic of police officers abusing their powers and disregarding constitutional rights, especially in communities of color? Or are such accusations unfair, especially given the enormous challenges of enforcing the law in 21st-century America? This book provides a unique frame of reference for understanding how some of the issues between the police and the public emerged, identifying events that have shaped current relationships between the police and the public, as well as the public's expectations and perceptions of the police. An authoritative resource for understanding modern law enforcement and its relationship with American communities, this volume addresses subjects including the legal underpinnings of various law enforcement actions and practices; the so-called militarization of police departments; the increased use of force and surveillance to combat crime and terrorism, and to generally "keep the peace"; and the perspectives of Black Lives Matter activists and other critics of American law enforcement. The entries provide readers with expert analysis of current topics related to the intensifying debate about the American police state; examine the scope of law enforcement issues that have existed for centuries, and explain why they continue to exist; and cover new mandates for exercising police power, enabling readers to critically analyze what is presented to them in the media. Included throughout the book are excerpts from important laws, speeches, reports, and studies pertaining to the subject of the use and abuse of police power in the United States

Citroën CX Owners Workshop Manual Audio Amateur Publications

Offering a unique perspective on the very notions and practices of storytelling, history, memory, and language, Clio's Laws collects ten essays (some new and some previously published in Spanish) by a revered voice in global history. Taking its title from the Greek muse of history, this opus considers issues related to the historian's craft, including nationalism and identity, and draws on Tenorio-Trillo's own lifetime of experiences as a historian with deep roots in both Mexico and the United States. By turns deeply ironic, provocative, and experimental, and covering topics both lowbrow and highbrow, the essays form a dialogue with Clio about idiosyncratic yet profound matters. Tenorio-Trillo presents his own version of an ars historica (what history is, why we write it, and how we abuse it) alongside a very personal essay on the relationship between poetry and history. Other selections include an exploration of the effects of a historian's autobiography, a critique of history's

celebratory obsession, and a guide to reading history in an era of internet searches and too many books. A self-described exile, Tenorio-Trillo has produced a singular tour of the historical imagination and its universal traits.

Digital Signal Processing in Power Electronics Control Circuits CRC Press

This revised and extended second edition covers problems concerning the design and realization of digital control algorithms for power electronics circuits using digital signal processing (DSP) methods. This book discusses signal processing, starting from analog signal acquisition, through conversion to digital form, methods of filtration and separation, and ending with pulse control of output power transistors. The book is focused on two applications for the considered methods of digital signal processing, a three-phase shunt active power filter and a digital class-D audio power amplifier. The book bridges the gap between power electronics and digital signal processing. Many control algorithms and circuits for power electronics in the current literature are described using analog transmittances. This may not always be acceptable, especially if half of the sampling frequencies and half of the power transistor switching frequencies are close to the band of interest. Therefore in this book, a digital circuit is treated as a digital circuit with its own peculiar characteristics, rather than an analog circuit. This helps to avoid errors and instability. This edition includes a new chapter dealing with selected problems of simulation of power electronics systems together with digital control circuits. The book includes numerous examples using MATLAB and PSIM programs.

Providing key data, insights, and ways of thinking about women and sports, this book is an excellent resource for high school and undergraduate students as well as for sport organizations serving girls and women. Women are participating in sports in record numbers, and thanks in part to Title IX and a growing interest in women's sports, they're breaking records and achieving remarkable success in sports in every conceivable manner. However, women still struggle for equitable treatment in a variety of sports and face different obstacles than do their male counterparts. How can these issues be solved? Are women in sports being treated fairly? This book provides a comprehensive yet accessible overview of the state of women's participation in sports by referencing both current events and research. Additionally, it offers a breadth of information pertaining to work in sports made available to girls and women. Key aspects include a detailed history of women in sports since 1900 as well as a discussion of current issues surrounding their participation in high school and college athletics, recreational sports, physical activity, and leadership in sports organizations. In particular, the material not only recounts history and analyzes issues but also presents perspectives as to how and why sports continue to be simultaneously a means of empowerment and a conduit for the marginalization of girls and women.
