The Famine of 1896-1897 in Bengal CUP Archive

Many influential stances within the social sciences regard nature in one of two ways: either as none of their concern (which is with the social and cultural aspects of human existence), or as wholly a social and cultural fabrication. But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other. These volumes contain the main contributions that have been made within each of these streams of thought. The selections illustrate to the reader the complexity of the various positions within these streams, and the strengths and limitations of each perspective. A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents.

This book is a focussed treatment of a famine both as an 'event' and a 'process'. It is a close-up of a peasant economy in the throes of a crisis which temporarily eroded the value-system determining the normal pattern of entitlements. An investigation of the socio-economic, ecological and cultural determinants of the famine helps evolve a coherent framework. The emphasis is on the distinctive problems of the various economic regions, most notably the tribal belts. Chakrabarti applies Amartya Sen's theory of exchange entitlements to a nineteenth century famine situation in Bengal, and finds that a market-based entitlement failure precipitating severe famine conditions, even without receiving any impulse from food

production , has little relevance here. Though teh book underlines the predicament of the subalterns, the famine is not seen from the viewpoint of any specific group or community. The focus is, rather, on the phenomenon of famine in its totality---on the agony and trauma of a peasant society thrown out of gear in an abnormal situation, and the crisis of identities that ensued.

Popular Mechanics Funstory

The true tales in this collection will take readers from the chicken houses of Arkansas to the caves of Venezuela and Mexico to the coast of Alaska. These fifteen adventures range from amusing to life threatening. Some are filled with suspense and danger in exotic places, while others document more routine but important biological field and lab work. Meet the roommate with the rash that wouldn't go away, a friendly bull, some blind cave fish, killer whales, drug smugglers, and hairy roots that are used to produce new medicines. Read about researchers crawling through rotten-egg-smelling muck in search of an elusive mosquitofish, diving into the cold black water of the White River in search of mussels, flying with bush pilots in Alaska, and working with David Attenborough in Arkansas. Here are teachers and researchers, biologists all, all from one university, real people who get their feet wet and their hands dirty in the pursuit of knowledge.

Considering such witnesses of the time as Shakespeare, Dante, Petrarch, Michelangelo, Machiavelli, Montaigne, More and Bacon, Agnes Heller looks at both the concept and the image of a Renaissance man. The concept was generalised and accepted by all; its characteristic features were man as a dynamic being, creating and re-creating himself throughout his life. The images of man, however, were very different, having been formed through the ideas and imagination of artists, politicians, philosophers, scientists and theologians and viewed from the different aspects of work, love, fate, death, friendship, devotion and the concepts of space and time. Renaissance Man thus stood as both as a leading protagonist of his time, one who led and formulated the substantial attitudes of his time, and as one who stood as a witness on the sidelines of the discussion. This book, first published in English in 1978, is based on the diverse but equally important sources of autobiographies, works of art and literature, and the writings of philosophers. Although she uses Florence as a starting point, Agnes Heller points out that the Renaissance was a social and cultural phenomenon common to all of Western Europe; her Renaissance Man is thus a figure to be found throughout Europe.

This book is a unique compilation of comprehensive works covering the potentials, challenges, and realities of geographical indications from an Indian perspective. The book encompasses critical studies on legal,

regulatory, and institutional frameworks and debates surrounding geographical indications. The concept of geographical indication has not received paramount importance in India compared to the other forms of intellectual property rights like patents and trademarks, while GI is becoming critical in national and international discourses. It aims at presenting both national and international situations and discussions, which will appeal to readers worldwide. This book in its first part elaborately deals with the genesis of the GI Act, and then it goes on to analyze both substantive as well as procedural aspects of the registration under the Indian GI Act and tries to identify the discrepancy and gaps in the laws. Also, a comparative perspective has been built by analyzing the GI laws and regulations of some developed countries with that of India. The challenges in existing regulation for quality control and enforcement of GI products in the Indian GI Act have been dealt comprehensively by the authors which are critical in achieving the stated objectives of the Act. The book also focuses on the role of geographical indication in the socio-economic development of rural India. The authors have illustrated how the GI can act as an effective mechanism for employment generation and sustainable growth opportunities in different sectors like agriculture, food, and handicraft. The interaction of GI with traditional knowledge and biodiversity and their impact on society is also extensively covered. The book contains real-life case studies by the authors from different states of India highlighting the success stories and missed opportunities of different GIs and the way forward where the GI can function as an effective tool for the overall development of a country and promote international trade. The book will provide law students, scholars from legal and IP disciplines, legal practitioners, producers, and policymakers a factual and multidimensional insight into the GI system in India. This will further promote research in this area, particularly from an Asian perspective and enhance the real-life application of GI to varied products.

Nature: The nature of human nature Funstory

This text brings together studies in various aspects of the theory of the capitalist economy. It focuses on major themes of the Marxist tradition that postulate the existence and importance of social relations and structures underlying the esoteric realm of economic categories: prices, profits, wages, etc. The author takes a reappraising, critical look at the concepts of the deep structure - value, exploitation, immanent crisis - using the analytical tools of modern economics to improve those concepts. The book is divided into four parts. Part 1 explores the essential nature of capitalism, re-examining problems in the theory of value and exploitation. Part 2 tackles the issue of capitalism-specific paths of growth and technical change, putting forward a rigorous theory of biased technical change and non-steady-state growth. Part 3 examines the cyclical character of capitalist growth and the theory of crises. Finally, Part 4 places capitalism in the wider framework of modes of production, considering the theory of precapitalist formations and aspects of the theory and practical experience of socialism. The guiding theme is the combination, or confrontation, of rigorous, quantitative analytical techniques with equally demanding qualitative and political-economic conceptualization. The book's premise is that this interface is essential to a progressive yet distinctively Marxist social theory.
