No ordinary " beginner ' s book, " it approaches every topic from a senior ' s point of view, using meaningful examples, step-by-step tasks, large text, close-up screen shots, and a full-color interior designed for comfortable reading. Full-color, step-by-step tasks walk you through watching TV today on a variety of devices – and saving money doing so. Learn how to Cut the cable and satellite cord Save money on your cable or satellite TV bill Watch local TV stations for free Choose the best TV and streaming media player for you Connect and use an Amazon Fire TV, Apple TV, Google Chromecast, or Roku device Watch Amazon Prime Video, Hulu, Netflix, and other streaming video services Use live streaming services like DirecTV Now, fuboTV, Hulu with Live TV, PlayStation Vue, Sling TV, and YouTube TV Find where to best watch sporting events Get a better picture with HD, Ultra HD, and HDR Get better sound with a sound bar or surround sound system Watch TV on your phone, tablet, or computer An AARP TV for Grownups publication The Wall Street Journal User's Guide Artech House With today's communications industry experiencing major changes on an almost daily basis, media managers must have a clear understanding of the different delivery platforms, as well as a grasp of critical management, planning, and economic factors in order to stay current and move their organizations forward. Telecommunications and Business Strategy helps current and future media professionals understand the relationship and convergence patterns between the broadcast, cable television, telephony, and Internet communication industries. Author Richard A. Gershon examines telecommunications industry structures and the management practices and business strategies affecting the delivery of information and entertainment services to consumers. He brings in specialists to present the finer points of management and planning responsibilities. Case studies from the International Radio and Television Society (IRTS) competition supplement the main text and offer an invaluable perspective on management issues. Developed for students in telecommunications management, electronic media management, and telecommunication economics, this volume also serves as a practical reference for the professional manager.

Drafting Technology Patent License Agreements Que Publishing

The definitive guidebook for using video in modern communication. Video (television, film, the moving image generally) is today ' s most popular information medium. Two-thirds of the world ' s internet traffic is video. Americans get their news and information more often from screens and speakers than through any other means. The Moving Image is the first authoritative account of how we have arrived here, together with the first definitive manual to help writers, educators, and publishers use video more effectively. Drawing on decades as an educator, publisher, and producer, MIT ' s Peter Kaufman presents new tools, best practices, and community resources for integrating film and sound into media that matters. Kaufman describes video ' s vital role in politics, law, education, and entertainment today, only 130 years since the birth of film. He explains how best to produce video, distribute it, clear rights to it, cite it, and, ultimately, archive and preserve it. With detailed guidance on producing and deploying video and sound for publication, finding and using archival video and sound, securing rights and permissions, developing distribution strategies, and addressing questions about citation, preservation, and storage—across the broadest spectrum of platforms, publications, disciplines, and formats—The Moving Image equips readers for the medium ' s continued ascendance in education, publishing, and knowledge dissemination in the decades to come. And, modeled in part on Strunk and White ' s classic, The Elements of Style, it ' s also a highly enjoyable read.

Media Ownership Plunkett Research, Ltd.

Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-to-person. "Digital Video Recorders" features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. "Digital Video Recorders" discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

Leo Laporte's Guide to TiVO Taylor & Francis

This work within The SAGE Reference Series on Leadership provides undergraduate students with an authoritative reference resource on political and civic leadership. This 2-volume set focuses on the 100 most important topics, issues, questions, and debates specific to politics and civic society. Entries provide students with more detailed information and depth of discussion than typically found in an encyclopedia entry while avoiding much of the jargon, detail and density one might find in a journal article or a research handbook chapter. Key Features Includes entries written by a global panel of renowned experts Offers broad coverage of important, of-the-moment topics related to political and civic leadership, including explorations of the personalities and environments of political leaders, leadership roles in governance and allegiance, citizen activists and civic engagement, political campaigning, urban politics and leadership, public management, ethics in politics, policy development and implementation, executive management of public opinion, political speechmaking and the "bully pulpit," congressional leadership, crisis management, and more Considers the history of political and civic leadership, with examples from the lives of pivotal figures, as well as the institutional settings and processes that lead to both opportunities and constraints unique to the political realm Provides students with more depth than usual encyclopedic entries while avoiding the jargon, detail, and density of more advanced works Features an approachable and clear writing style with appeal to undergraduate researchers and offers a list of further readings after each entry, as well as a detailed index and an online version of the work to maximize accessibility for today's students

My TV for Seniors Vault Inc.

This updated and expanded second edition reflects the state of earth station design and ground segment architecture. From international telephone network gateways to direct broadcast home receivers, today's broad range of ground systems and devices require satellite communication engineers and business managers to have a broad and sound understanding of the design and operating principles of earth stations and ground control facilities. This book explores the delivery end of the satellite link and its relationship to delivery of services. Authored by a leading authority in the field, the book provides engineers and managers with the knowledge they need to devise their own approach to implementing and managing earth stations and the overall ground segment. Readers find practical guidance in an array of critical areas, including: preparing requirements, performing preliminary analyses, reviewing hardware designs, managing the introduction of the overall ground segment, and more.

Telecommunications and Business Strategy CRC Press

A collection of unusual projects for computer hardware geeks of all ages explains how to create such projects as a personal Lojack system, Web-enabled coffee machine, cubicle intrusion detection systems, and a laptop battery extender.
