A user manual is a formal writing piece with a specific structure, and should be written by someone who is intimately familiar with the product such as a technical writer or the product designer. Writing an effective user manual requires knowing who is going to be using the product, then writing it with these users in mind.

User guide - Wikipedia

The user manual should contain both procedural information (step-by-step instructions) and conceptual information (information the

user needs in order to understand procedural information). A good user manual is concise and uses jargon-free language. A good user manual should answer HOW and WHAT questions.
