This book focuses on ubiquitous indoor localization services, specifically addressing the issue of floor plans. It combines computer vision algorithms and mobile techniques to reconstruct complete and accurate floor plans to provide better location-based services for both humans and vehicles via commodity smartphones in indoor environments (e.g., a multi-layer shopping mall with underground parking structures). After a comprehensive review of scene reconstruction methods, it offers accurate geometric information for each landmark from images and acoustics, and derives the spatial relationships of the landmarks and rough sketches of accessible areas with inertial and WiFi data to reduce computing overheads. It then presents the authors' recent findings in detail, including the optimization and probabilistic formulations for more solid foundations and better robustness to combat errors, several new approaches to promote the current sporadic availability of indoor location-based services, and a holistic solution for floor plan reconstruction, indoor localization, tracking, and navigation. The novel approaches presented are designed for different types of indoor environments (e.g., shopping malls, office buildings and labs) and different users. A valuable resource for researchers and those in start-ups working in the field, it also provides supplementary material for students with mobile computing and networking backgrounds.

Dispatches from the World of Fair Trade Coffee Apress

Prime Minister Malcolm Turnbull celebrates Australia as 'the most successful multicultural nation in the world'. This is a grand claim and important to a sense of identity and belonging, but at times it seems that multiculturalism is more an article of faith than a work in progress. What it really means in the twenty-first century is the focus of Griffith Review 61: Who We Are, which will examine both the opportunities offered and the complexities involved. The nation's population has virtually doubled since 1975, and in recent years the rules around migration have been altered significantly. Those who have chosen to make their home here in the past have changed Australia, and waves of

new arrivals continue to transform the country. Yet the apparent certainties of Australia as a permanent settler society are giving way to the precarious churn of temporary migration. This edition will give voice to this changing reality, explore the big issues of belonging, citizenship and participation, and tease out how contemporary Australia might evolve. This is a rich field, replete with policy questions and personal narratives. It is a success story, but the full picture is complex, and past achievements no guarantee of future results. The nation's boundaries are imaginary as much as physical, and constantly contested by an unsettled history and a shifting present. Renewed assertions of national identity run parallel to the increasing globalisation of opportunity and threat, as if the more fluid the world becomes, the greater the urge to hold onto something fixed and stable. Yet do we really know who 'we' are? Where does Australia begin and end? Who can claim to belong and who can be legitimately excluded? Julianne Schultz AM FAHA is the founding editor of Griffith Review, the award-winning literary and public affairs quarterly journal. Peter Mares is contributing editor with the online magazine Inside Story and senior moderator with The Cranlana Programme. Peter was a broadcaster with the ABC for twenty-five years, and is the author of two books – the award-winning *Borderline: Australia's Response to Refugees and Asylum Seekers in the Wake of the Tampa* and *Not Quite Australian: How Temporary Migration Is Changing the Nation*. 'An eclectic, thought-provoking and uniformly well-written collection.' Australian 'This is commentary of a high order. The prose is unfailingly polished; the knowledge and expertise of writers impressive.' Sydney Morning Herald 'For intelligent, well-written quarterly commentary...Griffith Review remains the gold standard.' Honest History

This book investigates, from a sociocultural, linguistic, and pedagogical perspective, the conceptual and pragmatic frameworks that characterize secondary language learning in a Northeast Asian context. Hadzantonis contextualizes these salient domains through an engagement with social and cultural themes such as the familial, political, as well as cultural commodities and socioeducational structures. In this way, the text employs tools such as transnational theory and performativity and develops a model that contributes to the resolution of one of the greatest economic issues of the time, that of ineffective secondary language learning.

The 7-Day Prayer Warrior Experience (Free One-Week Devotional) "O'Reilly Media, Inc."

Emilie Day believes in playing it safe: she's homeschooled, her best friend is her seizure dog, and she's probably the only girl on the Outer Banks of North Carolina who can't swim. Then Emilie's mom enrolls her in public school, and Emilie goes from studying at home in her pj's to halls full of strangers. To make matters worse, Emilie is paired with starting point guard Chatham York for a major research project on Emily Dickinson. She should be ecstatic when Chatham shows interest, but she has a problem. She hasn't told anyone about her epilepsy. Emilie lives in fear her recently adjusted meds will fail and she'll seize at school. Eventually, the worst happens, and she must decide whether to withdraw to safety or follow a dead poet's advice and "dwell in possibility." From Golden Heart award-winning author McCall Hoyle comes *The Thing with Feathers*, a story of overcoming fears, forging new friendships, and finding a first love, perfect for fans of Jennifer Niven, Robyn Schneider, and Sharon M. Draper.
