Nicomachean Ethics
Aristotle - The
Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation,

and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction

and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's Ethics in his political philosophy as a whole. The Nicomachean Ethics has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

Museums are frequently sites of struggle and negotiation. They are key cultural institutions that occupy an oftentimes uncomfortable place at the crossroads of the arts,

culture, various levels of government, corporate ventures, and the public. Because of this, museums are targeted by political action but can also provide support for contentious politics. Though protests at museums are understudied, they are far from anomalous. Tear Gas Epiphanies traces the as-yet-untold story of political action at museums in Canada from the early twentieth century to the present. The book looks at how museums do or do not archive protest ephemera, examining a range of responses to actions taking place at their thresholds, from active encouragement to belligerent dismissal. Drawing together extensive primary-source research and analysis, Robertson questions widespread perceptions of museums,

strongly arguing for a reconsideration of their role in contemporary society that takes into account political conflict and protest as key ingredients in museum life. The sheer number of protest actions Robertson uncovers is compelling. Ambitious and wide-ranging, *Tear Gas Epiphanies* provides a thorough and conscientious survey of key points of intersection between museums and protest – a valuable resource for university students and scholars, as well as arts professionals working at and with museums.

Handbook of Research on the Facilitation of Civic Engagement through Community Art Routledge

The Palgrave Handbook of Race

and the Arts in Education is the first edited volume to examine how race operates in and through the arts in education. Until now, no single source has brought together such an expansive and interdisciplinary collection in exploration of the ways in which music, visual art, theater, dance, and popular culture intertwine with racist ideologies and race-making. Drawing on Critical Race Theory, contributing authors bring an international perspective to questions of racism

and anti-racist interventions in the arts in education. The book's introduction provides a guiding framework for understanding the arts as white property in schools, museums, and informal education spaces. Each section is organized thematically around historical, discursive, empirical, and personal dimensions of the arts in education. This handbook is essential reading for students, educators, artists, and researchers across the fields

of visual and performing arts education, educational foundations, multicultural education, and curriculum and instruction.

The Methuen Drama Handbook of Interculturalism and Performance

Women artists of the Harlem Renaissance dealt with issues that were unique to both their gender and their race. They experienced racial prejudice, which limited their ability to obtain training and to be taken seriously as working artists.

They also encountered prevailing sexism, often an even more serious barrier. Including seventy-two black and white illustrations, this book chronicles the challenges of women artists, who are in some cases unknown to the general public, and places their achievements in the artistic and cultural context of early twentieth-century America. Contributors to this first book on the women artists of the Harlem Renaissance proclaim the legacy of Edmonia Lewis, Meta Vaux Warrick Fuller, Augusta

Savage, Selma Burke, Elizabeth Prophet, Lois Maillou Jones, Elizabeth Catlett, and many other painters, sculptors, and printmakers. In a time of more rigid gender roles, women artists faced the added struggle of raising families and attempting to gain support and encouragement from their often-reluctant spouses in order to pursue their art. They also confronted the challenge of convincing their fellow male artists that they, too, should be seen as important

standardisation resulting in various benefits for patient outcomes, evidence-based medicine and evidence-based practice have emerged as defining features of western healthcare provision in recent years. Most health professions are now adopting some form of 'evidence-based' framework for clinical training and practice. However, the rise of evidence-based healthcare has drawn sustained criticism regarding the limits of trial based evidence, the reductive character of epidemiological

study designs, and the potential for an erosion of the importance of lay perspectives and clinical judgement. Evidence-Based Healthcare in Context introduces readers to the social, cultural and historical underpinnings of 'evidence' in healthcare, critically examining questions about what constitutes 'evidence' and 'effectiveness' from perspectives outside medicine, including those of patients, complementary medicine and midwifery. It

focuses on the application of contemporary theoretical debates around the nature of medical and health knowledge, providing readers with a series of critical analyses of the production, application and translation of 'evidence' in a range of healthcare contexts. Featuring cutting edge work from leading social scientists in the UK, US, Canada, Norway, Australia and New Zealand, this volume draws on the latest empirical research to provide a thorough critical overview of this

important field of health research. *Configuring the New Lima Art Scene*

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, The Art of War is a must-read for

anybody who works in a competitive environment.

Critical Practice IGI Global Creative Frictions explores the relationship between visionary aspects of practice and policy. Despite over 30 years of arts and cultural policy attention, there remains a widespread view among the general public and artists alike that creative production does not reflect Australia's culturally diverse population. Australia's increasingly complex society can no longer be confined to 'essentialised' or traditional definitions of ethnic communities. While this diversity and its emerging complexity can be 'celebrated' as a source of creativity

and innovation, it can also give rise to social, political and creative challenges. A key challenge that remains for the arts sector is its ability to support the creative expression of cultural difference. One measure of inclusive creative production is to look at the participation of artists of non-English speaking backgrounds (NESBs)—a problematic term discussed in the book. There are half as many NESB artists compared to those of other professions participating in the workforce, and while under-representation is an issue for management in the arts sector, the question of representation also benefits from being understood more broadly beyond the

narrow sense of multiculturalism as a tool to manage cultural difference. This book explores the crucial role of creative leaders and how they work with the 'mainstream' while maintaining their creative integrity and independence to generate a 'virtuous' circle of change. Creative Frictions argues that it is the NESB artists who lead change in the arts sector and that creative and organisational leadership working in partnership make creative use of 'friction' and develop the necessary 'trust' to generate the 'traction' for a supportive multicultural arts milieu.

In recent years, the term global art has become a catchphrase in contemporary art discourses. Going beyond additive notions of canon expansion, this volume encourages a differentiated inquiry into the complex aesthetic, cultural, historical, political, epistemological and socio-economic implications of both the term global art itself and the practices it subsumes. Focusing on diverse examples of art, curating, historiography and criticism, the contributions not only take into account (new) hegemonies and exclusions but also the shifting conditions of transcultural art production, circulation and reception.

Nationalism and Youth in Theatre and Performance explores how children and young people fit into national political theatre and, moreover, how youth enact interrogative, patriotic, and/or antagonistic performances as they develop their own relationship with nationhood. Children are often seen as excluded

from public discourse or political action. However, this idea of exclusion is false both because adults place children at the center of political debates (with the rhetoric of future generations) and because children actively insert themselves into public discourse. Whether performing a national anthem for visiting heads of state, creating a school play about a country's birth, or marching in protest of a change in public policy, young people use theatre and performance as a

means of publicly staking a claim in national politics, directly engaging with ideas of nationalism around the world. This collection explores the issues of how children fit into national discourse on international stages. The authors focus on national performances by/for/with youth and examine a wide range of performances from across the globe, from parades and protests to devised and traditional theatre. Nationalism and Youth in Theatre and Performance rethinks how

national performance is defined and offers previously unexplored historical and theoretical discussions of political youth performance. *Library of Congress Subject Headings* UBC Press The self-immolation of Mohammed Bouazizi in Tunisia in December 2010 heralded the arrival of the 'Arab Spring,' a startling, yet not unprecedented, era of profound social and political upheaval. The meme of the Arab Spring is characterised by bottom-up change,

or the lack thereof, and its effects are still unfurling today. The Routledge Handbook of the Arab Spring seeks to provide a departure point for ongoing discussion of a fluid phenomenon on a plethora of topics, including: Contexts and contests of democratisation The sweep of the Arab Spring Egypt Women and the Arab Spring Agents of change and the technology of protest Impact of the Arab Spring in the wider Middle East and further afield Collating a wide array of viewpoints,

specialisms, biases, and degrees of proximity and distance from events that shook the Arab world to its core, the Handbook is written with the reader in mind, to provide students, practitioners, diplomats, policy-makers and lay readers with contextualization and knowledge, and to set the stage for further discussion of the Arab Spring.

Over the course of thirty-seven chapters, including an editorial introduction, this handbook provides a comprehensive examination of scholarly research and knowledge on a variety of aspects of women's collective activism in the United States, tracing both continuities and critical changes over time. Women have played pivotal and far-reaching roles in bringing about significant societal change, and women activists come from an array of different demographics, backgrounds and perspectives, including those that are radical, liberal, and conservative. The

chapters in the handbook consider women's activism in the interest of women themselves as well as actions done on behalf of other social groups. The volume is organized into five sections. The first looks at U.S. Women's Social Activism over time, from the women's suffrage movement to the ERA, radical feminism, third-wave feminism, intersectional feminism and global feminism. Part two looks at issues that mobilize women, including workplace discrimination, reproductive rights, health, gender identity and sexuality, violence against women, welfare and employment, globalization, immigration and anti-feminist and pro-life

causes. Part three looks at strategies, including movement emergence and resource mobilization, consciousness raising, and traditional and social media. Part four explores targets and tactics, including legislative forums, electoral politics, legal activism, the marketplace, the military, and religious and educational institutions. Finally, part five looks at women's participation within other movements, including the civil rights movement, the environmental movement, labor unions, LGBTQ movement, Latino activism, conservative groups, and the white supremacist movement. **Hope, Never Fear** The

This book provides a comprehensive and readable overview of the critical debates and controversies around tourism in Africa, and the major factors that are affecting tourism development now and in the future. Drawing upon research emerging from collaborations between a growing number of African academics and practitioners based in the continent and in the African diaspora as well as international colleagues, the Handbook offers key critical insights into the issues, challenges and

trends that Africa and African tourism is facing. Part I covers continent-wide issues such as climate change, ICT, heritage and development. The remaining parts are organised along geographic lines, with each chapter covering the development of tourism, current trends and discussion of critical issues such as community participation, gender, backpacking, urban tourism, wildlife tourism and conservation. Combining an overview of key theories, concepts, contemporary issues and debates, this book will be a valuable resource for

students, academics and practitioners investigating the role of tourism in Africa.

Across the British Empire and the world, the 1920s and 1930s were a time of unprecedented social and cultural change. Girls and young women were at the heart of many of these shifts. Out of this milieu, the Girl Guide movement emerged as a response to modern concerns about gender, race, class,

and social instability. In this book, Kristine Alexander analyzes the ways in which Guiding sought to mould young people in England, Canada, and India. It is a fascinating account that connects the histories of girlhood, internationalism, and empire, while asking how girls and young women understood and responded to Guiding's attempts to lead them toward a "useful" feminine future.
