The core idea for this book is the use of operative verbs as tools for designing

space. These operative verbs abstract the idea of spatial formation to its most basic terms, allowing for an objective approach to create the foundation for subjective spatial design. Examples of these verbs are expand, inflate, nest, wist, lift, embed, merge and many more. Together they form a visual dictionary decoding the syntax of spatial verbs. The verbs are illustrated with three-dimensional diagrams and pictures of designs which show the verbs 'in action'. This approach was devised, tested, and applied to architectural studio instruction by Anthony Di Mari and Nora Yoo while teaching at Harvard University's Career Discovery Program in Architecture in 2010. As instructors and as recent graduates, they saw a need for this kind of catalogue from both sides - as a reference manual applicable to design students in all stages of their studies, as well as a teaching tool for instructors to help students understand the strong spatial potential of abstract operations.

Construction Documents using SketchUp Pro & LayOut by Paul Lee shows professionals & enthusiasts how to tie all the parts of SketchUp Pro together to produce drawings that were traditionally the domain of CAD. For the first time, by using Paul Lee's methodology it is possible to produce fully-fledged construction files from 3D model-centred information. Create wire-frames of your model that describe the "CAD" detail. Learn how to make this information appear in plan, section and elevation scenes. Then use this information in LayOut to create top quality construction files. NOTE: The exercises in this book are concentrated into the creation of a simple set of drawings of a table in plan, section and elevation. This is a microcosm of the means by which larger drawings can then be produced. The companion SketchUp and LayOut samples for download illustrate this point. Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of "beauty tangled in a rapture with violence." Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers.
