A NEW YORK TIMES BESTSELLER WINNER OF THE 2019 NATIONAL BOOK AWARD FOR NONFICTION A brilliant, haunting and unforgettable memoir from a stunning new talent about the inexorable pull of home and family, set in a shotgun house in New Orleans East. In 1961, Sarah M. Broom’s mother Ivory Mae bought a shotgun house in the then-promising neighborhood of New Orleans East and built her world inside of it. It was the height of the Space Race and the neighborhood was home to a major NASA plant—the postwar optimism seemed assured. Widowed, Ivory Mae remarried Sarah’s father Simon Broom; their combined family would eventually number twelve children. But after Simon died, six months after Sarah’s birth, the Yellow House would become Ivory Mae’s thirteenth and most unruly child. A book of great ambition, Sarah M. Broom’s *The Yellow House* tells a hundred years of her family and their relationship to home in a neglected area of one of America’s

most mythologized cities. This is the story of a mother’s struggle against a house's entropy, and that of a prodigal daughter who left home only to reckon with the pull that home exerts, even after the Yellow House was wiped off the map after Hurricane Katrina. *The Yellow House* expands the map of New Orleans to include the stories of its lesser known natives, guided deftly by one of its native daughters, to demonstrate how enduring drives of clan, pride, and familial love resist and defy erasure. Located in the gap between the “Big Easy” of tourist guides and the New Orleans in which Broom was raised, *The Yellow House* is a brilliant memoir of place, class, race, the seeping rot of inequality, and the internalized shame that often follows. It is a transformative, deeply moving story from an unparalleled new voice of startling clarity, authority, and power.

Public participation is a vital part of constitution-making processes around the world, but we know very little about the extent to which participation affects constitutional texts. In this book, Alexander Hudson offers a systematic measurement of the impact of public participation in three much-cited cases - Brazil, South Africa, and Iceland - and introduces a theory of party-mediated public participation. He argues that public participation has limited potential to affect the constitutional text but that the effectiveness of participation varies with the political context. Party strength is the key factor, as strong political parties are unlikely to incorporate public input, while weaker parties are

comparatively more responsive to public input. This party-mediation thesis fundamentally challenges the contemporary consensus on the design of constitution-making processes and places new emphasis on the role of political parties.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

This book provides the first comprehensive study of Anthony Neilson ' s unconventional rehearsal methodology. Neilson ' s notably collaborative rehearsal process affords an unusual amount of creative input to the actors he works with and has garnered much interest from scholars and practitioners alike. This study analyses material edited from 100 hours of footage of the rehearsals of Neilson ' s 2013 play Narrative at the Royal Court Theatre, as well as interviews with Neilson himself, the Narrative cast and actors from other Neilson productions. Replete with case studies, Gary Cassidy also considers the work of other relevant practitioners where appropriate, such as Katie Mitchell, Forced Entertainment, Joan Littlewood, Peter Brook, Complicite ' s Simon McBurney, Stanislavski and Sarah Kane. Contemporary Rehearsal Practice will be of great interest to scholars, students and practitioners of theatre and performance and those who have an interest in rehearsal studies.

Sunburnt Cities Simon & Schuster

In recent years there has been a growing focus on urban and environmental studies, and the skills and techniques needed to address the wider challenges of how to create sustainable communities. Central to that demand is the increasing urgency of addressing the issue of urban decline, and the response has almost always been to pursue growth policies to attempt to reverse that decline. The track record of growth policies has been mixed at best. Until the first decade of the twenty-first century decline was assumed to be an issue only for former industrial cities – the so-called Rust Belt. But the sudden reversal in growth in the major cities of the American Sunbelt has shown that urban decline can be a much wider issue. Justin Hollander ' s research

into urban decline in both the Sun and Rust Belts draws lessons planners and policy makers that can be applied universally. Hollander addresses the reasons and statistics behind these "shrinking cities" with a positive outlook, arguing that growth for growth ' s sake is not beneficial for communities, suggesting instead that urban development could be achieved through shrinkage. Case studies on Phoenix, Flint, Orlando and Fresno support the argument, and Hollander delves into the numbers, literature and individual lives affected and how they have changed in response to the declining regions. Written for urban scholars and to suit a wide range of courses focused on contemporary urban studies, this text forms a base for all study on shrinking cities for professionals, academics and students in urban design, planning, public administration and sociology.

What are you? Obviously, you are a person with human ancestors that can be plotted on a family tree, but you have other identities as well. According to evolutionary biologists, you are a member of the species Homo sapiens and as such have ancestral species that can be plotted on the tree of life. According to microbiologists, you are a collection of cells, each of which has a cellular ancestry that goes back billions of years. A geneticist, though, will think of you primarily as a gene-replication machine and might produce a tree that reveals the history of any given gene. And finally, a physicist will give a rather different answer to the identity question: you can best be understood as a collection of atoms, each of which has a very long history. Some have been around since the Big Bang, and others are the result of nuclear fusion that took place within a star. Not only that, but most of your atoms belonged to other living things before joining you. From your atoms' point of view, then, you are just a way station on a multibillion-year-long journey. You: A Natural History offers a multidisciplinary investigation of your hyperextended family tree, going all the way back to the Big Bang. And while your family tree may contain surprises, your hyperextended history contains some truly amazing stories. As the result of learning more about who and what you are, and about how you came to be here, you will likely see the world around you with fresh eyes. You will also become aware of all the one-off events that had to take place for your existence to be possible: stars had to explode, the earth had

to be hit 4.5 billion years ago by a planetesimal and 65 million years ago by an asteroid, microbes had to engulf microbes, the African savanna had to undergo climate change, and of course, any number of your direct ancestors had to meet and mate. It is difficult, on becoming aware of just how contingent your own existence is, not to feel very lucky to be part of our universe.

In the run-up to the Malaysian General Elections, the Board felt that the country was under threat. The Board blamed human rights activists and other liberal movements for sowing discord. As a Malaysia Day gift to the nation, the Prime Minister abolished some draconian laws — but the Board had other plans. The Board engaged a shadowy trio called MAC (Maestro, Architect, Choreographer) to bring back the GODs. In executing their plans, an Ex-Special Force personnel

named Reyza was brought in to introduce panic among the public through acts of violence. In the face of this terror, the public openly welcomed back the GODs. But what are the GODs, and why isn't everyone happy to see them return? (Buku Fixi) (Fixi Novo)

Moto Guzzi Haynes Publishing

This book tells the story of one of the world ' s most innovative, beloved, and famous motorcycle manufacturers on its 100th anniversary. In 1921, Giorgio Parodi founded Moto Guzzi with the mechanic Carlo Guzzi. The purpose of the company was to design innovative motorcycles in the Mandello del Lario headquarters on Lake Como, where the factory still stands today. Moto Guzzi bikes immediately stood out for their high performance and technical sophistication. Their greatness was proven by competition wins, and these sporting triumphs were accompanied by commercial success that made Moto Guzzi the most important motorcycle manufacturer in Italy. These victories did not happen by chance, but were the result of continuous innovation. The company soon decided to withdraw from competitions because of its “ manifest superiority ” and instead focused on production. It has since continued to churn out iconic innovations and models, like the California, which was chosen by the LAPD for their patrols. Moto Guzzi is no longer just a motorcycle but, like Harley-Davidson, it has become a style, a philosophy and a sign of belonging to the Guzzi tribe that unites movie stars like Ewan McGregor with acclaimed designers like Tom Dixon, musicians like Billy Joel, and astronauts such as Paolo Nespoli.
