Hong Kong University Press

Trieste Publishing has a massive catalogue of classic book titles.

Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality

control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Springer Science & Business Media

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water in a Pool Painted Black* and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights, Big City*, before the art world exploded, before New York

changed into a yuppie metropolis, while it still had a glimmer of bohemian life. *What You Can Do With Your Computer* Legare Street Press

This book brings together a cutting-edge selection of the most current applications of mindfulness-based cognitive therapy (MBCT), giving clinicians as well as researchers a concise guide to current and future directions. Each chapter begins with an illustrative case study to give readers an example of how MBCT would be used in the clinical setting, followed by an overview of the condition, the theoretical rationale for using MBCT, modifications of MBCT for that disorder, evidence for MBCT use. Chapters also discuss practical considerations of MBCT, including patient selection, home practice, group size, format, and facilitator training. Written

by some of the world ' s leading physicians using MBCT, Mindfulness-Based Cognitive Therapy: Innovative Applications is of great value to psychiatrists, psychologists, social workers, and therapists. *Paths of Justice* NYU Press Wonderful holiday and travel diary with pages to fill This Book is for Personal emergency information information about your hotel (address, phone number etc) packing lists Checklists Area for emergency contacts, friends and family Information about your trip This Book is for: holiday Wanderer Travelers Camper Backpacker Friends of Nature globetrotter for what , this book is: notebook Diary travel diary Hiking Diary Pilgrim Diary Photo Album holiday memories Or simply as a beautiful book for everyday use Further information on the book: 120 pages 6x9 inches

approx DIN A5L Mattes Softcover (fits comfortably in the hand) cream-colored paper Do you know a tourist who soon begins his next trip? Then this book is perfect as a small gift. Whether as a parting gift, a birthday, Christmas or just because. About this book everyone is pleased is in the holiday mood. *A Catalogue of the Tamil Books in the Library of the British Museum* Mindfulness-Based Cognitive Therapy Innovative Applications THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that discuss, interpret and apply the filed-rate doctrine. The selection of decisions spans from 2010 to the date of publication. Under the filed rate doctrine, "any 'filed rate' -- that is, one approved by the governing regulatory agency -- is per se reasonable and unassailable in judicial proceedings brought by ratepayers." *Wegoland Ltd. v.*

NYNEX Corp., 27 F.3d 17, 18 (2d Cir.1994). The doctrine is grounded on two rationales: first, that courts should not "undermine[] agency rate-making authority" by upsetting approved rates (the principle of "nonjusticiability"); and, second, that litigation should not become a means for certain ratepayers to obtain preferential rates (the principle of "nondiscrimination").

Marcus v. AT & T Corp., 138 F.3d 46, 58, 61 (2d Cir.1998); see generally Keogh v. Chi. & Nw. Ry. Co., 260 U.S. 156, 43 S.Ct. 47, 67 L.Ed. 183 (1922). The doctrine reaches both federal and state causes of action and protects rates approved by federal or state regulators. Wegoland, 27 F.3d at 20. Its application does not "depend on the nature of the cause of action the plaintiff seeks to bring" or "the culpability of the defendant's conduct or the possibility of inequitable results." Marcus, 138 F.3d at 58. Whenever a ratepayer's claim against a rate filer would implicate either

the non-justiciability principle or the nondiscrimination principle, it is barred. Id. at 59. Rothstein v. Balboa Ins. Co., *ibid.*

Copywrongs Serpents Tail Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate

struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

Asia Pacific Advances in Consumer Research

Springer

Erosive tooth wear is a multifactorial condition of growing concern to the clinician and is a subject of extensive research. This book is the first which deals in such detail with dental erosion. It presents the whole spectrum of views on the issue, from the molecular level to behavioral aspects, as well as trends in society. The multifactorial etiological pattern of erosive tooth wear is emphasized and is a strand connecting the different chapters of the book. Definition, diagnosis, prevalence, incidence and chemistry of dental erosion are discussed in the first part of the publication. Further, topics like extrinsic and intrinsic causes of dental erosion are covered and a chapter is devoted to

dental erosion in children.

Methods of assessment are presented and critically evaluated. The book concludes with themes on dentinal hypersensitivity, risk assessment and preventive measures and restorative options for erosive lesions. This publication is not only highly recommended to faculty members, researchers and dental students, but also to practitioners and other dental professionals who are committed to the prevention and treatment of dental erosion.

This book presents cutting-edge research on innovative system interfaces, highlighting both lifecycle development and human-technology interaction, especially in virtual, augmented and mixed reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability, and discusses new models, case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, while minimizing costs. It also highlights the forces currently shaping the nature of computing and systems, such as the importance of portability and technologies for reducing power

requirements; the need for better assimilation of computation in the environment; and solutions to promote computer and system accessibility for people with special needs. Based on the AHFE 2020 Virtual Conference on Human Factors and Systems Interaction, held on July 16–20, 2020, the book offers a timely survey and a practice-oriented guide for systems interface users and developers alike.

Urban slum

dwellers—especially in emerging-economy countries—are often poor, live in squalor, and suffer unnecessarily from disease, disability, premature death, and reduced life expectancy.

Yet living in a city can and should be healthy. *Slum Health* exposes how and why slums can be unhealthy; reveals that not all slums are equal in terms of the hazards and health issues faced by residents; and suggests how slum dwellers, scientists, and

social movements can come together to make slum life safer, more just, and healthier. Editors Jason Corburn and Lee Riley argue that valuing both new biologic and “street” science—professional and lay knowledge—is crucial for improving the well-being of the millions of urban poor living in slums.

You will be billed separately at the then-current price. Upon receipt, you will have 30 days to purchase or return. Of course, you may cancel this automatic supplementation program at any time simply by notifying Aspen Publishers in writing.

Filed Rate Doctrine Karger Medical and Scientific Publishers

This open access edited book captures the complexities and conflicts arising at the interface of intellectual property rights (IPR) and competition law. To do so, it discusses four specific themes: (a) policies governing functioning of standard setting organizations (SSOs), transparency and incentivising

future innovation; (b) issue of royalties for standard essential patents (SEPs) and related disputes; (c) due process principles, procedural fairness and best practices in competition law; and (d) coherence of patent policies and consonance with competition law to support innovation in new technologies. Many countries have formulated policies and re-oriented their economies to foster technological innovation as it is seen as a major source of economic growth. At the same time, there have been tensions between patent laws and competition laws, despite the fact that both are intended to enhance consumer welfare. In this regard, licensing of SEPs has been debated extensively, although in most instances, innovators and implementers successfully negotiate licensing of SEPs. However, there have been instances where disagreements on royalty base and royalty rates, terms of licensing, bundling of patents

in licenses, pooling of licenses have arisen, and this has resulted in a surge of litigation in various jurisdictions and also drawn the attention of competition/anti-trust regulators. Further, a lingering lack of consensus among scholars, industry experts and regulators regarding solutions and techniques that are apposite in these matters across jurisdictions has added to the confusion. This book looks at the processes adopted by the competition/anti-trust regulators to apply the principles of due process and procedural fairness in investigating abuse of dominance cases against innovators.

This book constitutes the proceedings of two conferences: The 5th International Conference on ArtsIT, Interactivity and Game Creation (ArtsIT 2016) and

the First International Conference on Design, Learning and Innovation (DLI 2016). ArtsIT is reflecting trends in the expanding field of digital art, interactive art, and how game creation is considered an art form. The decision was made to augment the title of ArtsIT to be in future known as “The International Conference on Interactivity, Game Creation, Design, Learning, and Innovation”. The event was hosted in Esbjerg, Denmark in May 2016 and attracted 76 submissions from which 34 full papers were selected for publication in this book. The papers represent a forum for the dissemination of cutting-edge research results in the area of arts, design and technology.

During NASA Increments 5, 6, and 7 (May 1997 to June 1998), about eight

gigabytes of acceleration data were collected by the Space Acceleration Measurement System (SAMS) onboard the Russian Space Station Mir. The data were recorded on twenty-seven optical disks which were returned to Earth on Orbiter missions STS-86, STS-89, and STS-91. During these increments, SAMS data were collected in the Priroda module to support various microgravity experiments. This report points out some of the salient features of the microgravity acceleration environment to which the experiments were exposed. This report presents an overview of the SAMS acceleration measurements recorded by 10 Hz and 100 Hz

sensor heads. The analyses included herein complement those presented in previous Mir increment summary reports prepared by the Principal Investigator Microgravity Services project.
