The main theme of this year's congress is 'Animal lives worth living'. This theme focuses on our responsibility for all animals kept or influenced by humans, to ensure that we can provide a life for them that takes into account all relevant aspects of animal welfare, aided by applied ethology as the key scientific discipline. This not only means avoiding and alleviating suffering but also promoting resilience and positive experiences. By monitoring and interpreting animal behaviour, we gain important insights into each of these aspects of quality of life.

Technical Guide, SG24-8851 and IBM z15 (8562) Technical Guide, SG24-8852. Bradstreet's Weekly American Gear Manufacturers Association In *Authoring Autism* Melanie Yergeau defines neurodivergence as an identity—neuroqueerness—rather than an impairment. Using a queer theory framework, Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics. She also critiques early intensive behavioral interventions—which have much in common with gay conversion therapy—and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions.

Using storying as her method, she presents an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best-equipped people to define their experience. Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical, Yergeau shows how autistic people queer the lines of rhetoric, humanity, and agency. In so doing, she demonstrates how an autistic rhetoric requires the reconceptualization of rhetoric's very essence.

This fully revised and corrected edition of the International Classification of Primary Care 2e (ICPC-2) is indispensable for anyone wishing to use the international classification system for classification of morbidity data in a primary care setting. The concept of ICPC-2 has not been changed but the main body of the actual classification (chapter 10) has been completely revised to reflect the adequate use for an

individual patient record and for research purposes. This now brings the printed version of ICPC-2 completely in-line with the electronic version previously only available through the Oxford Website for the journal Family Practice. ICPC-2 is patient-oriented rather than disease or provider-oriented. It encompasses both the patient's reason for encounter and the patient's problem. ICPC-2 is extensively used internationally and includes a detailed conversion system for linking the ICPC and ICD-10 codes published by WHO, additional inclusion criteria, and cross-referencing rubrics. ICPC-2 It has been developed based on the recognition that building the appropriate primary care systems to allow the assessment and implementation of health care priorities is possible only if the right information is available to health care planners.

The Etude

From a MacArthur "Genius," a bold new perspective on the history of Asia, highlighting the long quest to tame its

waters Asia's history has been shaped by her waters. In *Unruly Waters*, historian Sunil Amrith reimagines Asia's history through the stories of its rains, rivers, coasts, and seas--and of the weather-watchers and engineers, mapmakers and farmers who have sought to control them. Looking out from India, he shows how dreams and fears of water shaped visions of political independence and economic development, provoked efforts to reshape nature through dams and pumps, and unleashed powerful tensions within and between nations. Today, Asian nations are racing to construct hundreds of dams in the Himalayas, with dire environmental impacts; hundreds of millions crowd into coastal cities threatened by cyclones and storm surges. In an age of climate change, *Unruly Waters* is essential reading for anyone seeking to understand Asia's past and its future.
