Using student growth data

to inform instruction can be a
valuable and efficient tool for
driving students' academic
gains. When you make data
actionable, you make
assessment matter. To fully
benefit from assessment,
students and teachers need
to use the data to invoke
meaningful change.

Introduction to Data-Driven
Educational Decision Making
Data-driven educational decision

making refers to the process by which educators examine assessment data to identify student strengths and deficiencies and apply those findings to their practice. This process of critically examining curriculum and instructional practices relative to students' actual performance on standardized tests and other assessments yields data that help teachers make more accurately informed instructional decisions (Mertler, 2007; Mertler & Zachel, 2006).

Using Data To Guide Instruction - test.enableps.com

Data walls are extremely helpful. It allows the teacher and leadership teams to look at the data and find trends or areas of weaknesses. Based on the data teachers can plan

their lessons and strategically group students based on their needs. It is a easy way to track the data and very user friendly.

Using Assessment Data to Inform Instruction
By educating themselves about the effective use of data, leadership teams can help build these capacities in their staffs. This module will guide your leadership team to: develop an understanding of how to use multiple data sources; analyze data to trace the causes of low achievement and find solutions; and articulate how to support

teachers ' use of data to improve instruction.
