### **Using Data to Guide Instruction - [asq.org](http://asq.org)**

Data-driven educational decision making refers to the process by which educators examine assessment data to identify student strengths and deficiencies and apply those findings to their practice. This process of critically examining curriculum and instructional practices relative to students' actual performance on standardized tests and other assessments yields data that help teachers make more accurately informed instructional decisions (Mertler, 2007; Mertler & Zachel, 2006).
