The usual procedure is to attach the converter to the camera lens mount by seating it in place and turning. The spring holds it in place. Now you can screw the lens onto the adapter. To remove, unscrew the lens leaving the adapter on the body. Then use that little spring and rotate off the adapter.

Why Every Photographer Should Use a Manual Focus Lens

Using a vintage SLR lens on a DSLR can be a fun and, occasionally, frustrating experience. (Not all the inexpensive glass you dig up on eBay is going to suit your needs.) To help you find that perfect analog match for your high-tech digital SLR, we've picked our ten favorite classic SLR lenses that will get you shooting timeless images with your DSLR right away. The best part of all? Many of ... Manual lenses on a DSLR | Photo.net Photography Forums

If it is a lens without an automatic diaphragm (e. g. a "Reflex-Nikkor" or a shift lens / PC-Nikkor) you can use it. For an automatic lens you have to have a closer look at the aperture ring. If it has two scales with f-stop numbers, a larger one towards the front of the lens and a smaller one towards the camera, then you have an AI, AI-s, Series E or factory AI'd lens. You can use it on your DSLR (or modern SLR). Enjoy it!
