[Using Turbo C](#)

People who are using Turbo C are probably doing so because it's a requirement, not because they don't know about anything better. Odds are it's for a programming class where the assignments they turn in have to work in that compiler. When I was grading C++ assignments, it didn't matter what compiler the students used, but they had to compile and run properly with the compiler I was using.

[How to make first C program -Compile and run in Turbo c++](#)

Programing involves hard work, passion, knowledge and an IDE (Integrated Development Environment) sadly, for a lot of people who are into C or C++ programming, IDE is Turbo C++. For those who have no idea what Turbo C++ is: Turbo C++ is an IDE that is used to write and compile code for C and C++.
