"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first

published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the

law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface. This book examines the changing business and economic environment for postal services in Lithuania and the upcoming challenges for this industry. Postal services continue to play a central part in the development of national

economies. However, the economic and social role of postal services has changed rapidly and fundamentally over the last two decades. In most industrialized countries, paper-based communications are in serious decline, while the demand for parcel delivery services is rising steadily with the continuing development of e-commerce, just-in-time production techniques, and global supply chains. For the postal sector as a whole, the centre of gravity has shifted dramatically from letters and documents to parcels. The authors explain how the organizational paradigm has inexorably shifted from that of a national, government-owned postal administration providing the basic delivery services required by society, to a system of interdependent local and regional undertakings that both compete and cooperate with one another. The book argues that there are no indications that

the postal sector has stopped changing, and that it seems most probable that the European Union ' s postal sector will look quite different in 2035 than it does today. In closing, the book explains how the shareholders of postal services companies have recently confirmed that the time has come to rethink the strategy of creating and maintaining competitiveness in the postal services industry.

This book explores how states in political transition use stamps to promote a new visual nationalism. Stamps as products of the state and provide small pieces of information about a state ' s heritage, culture, economies and place in the world. These

depictions change over time, reflecting political and cultural changes and developments. The volume explores the transition times in more than a dozen countries from Africa, Latin America, Asia and Europe. Specifically addressed are the stamp topics, issues and themes in the years before and after such major changes occurred, for example, from a European colony to political independence or from a dictatorship to democracy. The authors compare the personalities, histories, and cultural representations "before" the transition period and how the state used the "after" event to define or redefine its place on the world political map. The final three chapters consider international themes on many stamp issues, one being stamps with Disney cartoon

characters, another on "themeless" Forever stamps, and the third on states celebrating women and their accomplishments. This volume has wide interdisciplinary relevance and should prove of particular interest to those studying geopolitics, political transition, visual nationalism, soft power and visual representations of decolonializing.
