There are thousands of highly practical and often entertaining astrology books freely available to consumers who have become familiar with the basic parameters of astrology. The authors of these books, and most other astrologers, analyze only the "ten planets" --the sun and the nine planets of our solar system. Author William Noah asserts that this simple method is insufficient because the energy of mankind is not solely captured in the planets. Noah's all-inclusive work serves as a tutorial and reference for the world of asteroids and planets. Of the thousands of asteroids in the universe, Noah has selected twenty key asteroids that are the most relevant to the events, experiences, encounters, and future possibilities of the astrology-interested public. Noah's comprehensive work includes: Charts with meaning and symbolism of zodiac signs and houses Lists of planetary symbolism and meaning Alignment of chart interpretation with the complementary astro-mythic energy characterization of triangular Grand Trine formations depicting the meaning and permanent effect for life momentum Natal charts for every president of the United States Natal charts for popular American celebrities The "Astrology of America" goes beyond analysis of the planets to prepare horoscopes by introducing preselected asteroids into the astrological mix. Noah believes his use of these asteroids, along with planetary placement, builds a framework that identifies the surest way to reach success and meaning in life.
