"Laura Lynne Jackson is a psychic medium and the author of the New York Times bestseller *The Light Between Us*. She possesses an incredible gift--the ability to communicate with loved ones who have passed, convey messages of love and healing, and impart a greater understanding of our interconnectedness. Though her abilities are exceptional, they are not unique, and that is the message at the core of this book. Understanding "the secret language of the universe" is a gift available to all. As we learn to ask for and recognize signs from the other side, we will start to find meaning where before there was only confusion, we will see light in the darkness. We may decide to change paths, push toward love, pursue joy, and engage with life in a whole new way. In *Signs*, Jackson is able to bring the mystical into the everyday. She relates stories of people who have experienced these uncanny revelations and instances of unexplained synchronicity, as well as those drawn from her own experience. There's the producer whose lost child appears to her as a deer that approaches her unhesitatingly at a highway rest stop; the name tag of an ER nurse that lets a terrified wife know that her husband will be okay; the Elvis Presley song that arrives at the exact time of her own father's passing; and many others. This is a book that is both inspiring and practical, deeply comforting and wonderfully motivational in asking us to see beyond ourselves to a more magnificent universal design"--

'The best Australian novel I have read in more than a decade' Sydney Morning Herald

'Astonishing, captivating ... a wild, beautiful, heart-exploding ride' Elizabeth Gilbert The bestselling novel that has taken Australia, and the world, by storm. Winner of Book of the Year at the 2019 Indie Book Awards, winner of a record four Australian Book Industry Awards in 2019, including the prestigious Book of the Year Award, and winner of the 2019 UTS Glenda Adams Award for New Writing, NSW Premier's Literary Awards Brisbane, 1985: A lost father, a mute brother, a junkie mum, a heroin dealer for a stepfather and a notorious crim for a babysitter. It's not as if Eli Bell's life isn't complicated enough already. He's just trying to follow his heart and understand what it means to be a good man, but fate keeps throwing obstacles in his way - not the least of which is Tytus Broz, legendary Brisbane drug dealer. But now Eli's life is going to get a whole lot more serious: he's about to meet the father he doesn't remember, break into Boggo Road Gaol on Christmas Day to rescue his mum, come face to face with the criminals who tore his world apart, and fall in love with the girl of his dreams. A story of brotherhood, true love and the most unlikely of friendships, *Boy Swallows Universe* will be the most heartbreaking, joyous and exhilarating novel you will read all year. Awards: 2019 ABIA Book of the Year Award, Winner 2019 Indie Book Award, Winner 2019 UTS Glenda Adams Award for New Writing, NSW Premier's Literary Awards, Winner 2019 People's Choice Award, NSW Premier's Literary Awards, Winner MUD Literary Prize 2019, Winner 2019 ABIA Matt Richell Award for New Writer of the Year, Winner 2019 ABIA Literary Fiction Book of the Year, Winner 2019 ABIA Audiobook of the Year, Winner 2019 Miles Franklin Literary Award, Longlisted 2019 Colin Roderick Award, shortlist Reviews: 'Boy Swallows Universe is a wonderful surprise: sharp as a drawer full of knives in terms of subject matter; unrepentantly joyous in its child's-eye view of the world; the best literary debut in a month of Sundays.' The Australian 'Boy Swallows Universe hypnotizes you with wonder, and then hammers you with heartbreak.' Washington Post 'This thrilling novel' New York Times Book Review 'Marvelously plot-rich ... filled with beautifully lyric prose ... At one point Eli wonders if he is good. The answer is "yes," every bit as good as this exceptional novel.' Booklist 'Dalton's splashy, stellar debut makes the typical coming-of-age novel look bland by comparison ... This is an outstanding debut.' Publisher's Weekly (starred review) 'Extraordinary and beautiful storytelling' Guardian

This book, a first in its kind, offers a survey of the present state of affairs in media accessibility research and practice. It focuses on professional practices which are relative newcomers within the field of audiovisual translation and media studies, namely, audio description for the blind and visually impaired, sign language, and subtitling for the deaf and the hard-of-hearing for television, DVD, cinema, internet and live performances. Thanks to the work of lobbying groups and the introduction of legislation in some countries, media accessibility is an area that has recently gained marked visibility in our society. It has begun to appear in university curricula across Europe, and is the topic of numerous specialised conferences. The target readership of this book is first and foremost the growing number of academics involved in audiovisual translation at universities ? researchers, teachers and students ? but it is also of interest to the ever-expanding pool of practitioners and translators, who may wish to improve their crafts. The collection also addresses media scholars, members of deaf and blind associations, TV channels, and cinema or theatre managements who have embarked on the task of making their programmes and venues accessible to the visually and hearing impaired. INSTANT NEW YORK TIMES BESTSELLER “ Most appealing... technical accuracy and lightness of tone... Impeccable. ” —Wall Street Journal “ A porthole into another world. ” —Scientific American “ Brings science dissemination to a new level. ” —Science The most trusted explainer of the most mind-boggling concepts pulls back the veil of mystery that has too long cloaked the most valuable building blocks of modern science. Sean Carroll, with his genius for making complex notions entertaining, presents in his uniquely lucid voice the fundamental ideas informing the modern physics of reality. Physics offers deep insights into the workings of the universe but those insights come in the form of equations that often look like gobbledygook. Sean Carroll shows that they are really like meaningful

poems that can help us fly over sierras to discover a miraculous multidimensional landscape alive with radiant giants, warped space-time, and bewilderingly powerful forces. High school calculus is itself a centuries-old marvel as worthy of our gaze as the Mona Lisa. And it may come as a surprise the extent to which all our most cutting-edge ideas about black holes are built on the math calculus enables. No one else could so smoothly guide readers toward grasping the very equation Einstein used to describe his theory of general relativity. In the tradition of the legendary Richard Feynman lectures presented sixty years ago, this book is an inspiring, dazzling introduction to a way of seeing that will resonate across cultural and generational boundaries for many years to come.

Overbuild: The New RBOC Advanced Access Architecture Strategy? BRILL

Broken Promises is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promises) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).

A Death Sentence on Your 60th Birthday is Just the Beginning... It's Hank Reed's birthday. As a citizen of the United Federation of Nations that means a mandatory death sentence simply because he turned sixty years old. Referred to as "retirement," it's one of the desperate steps the government has taken to curb overpopulation. Retirement is a widely accepted fact of life on a dying planet ruled by a tyrannical government. Hank's execution goes ahead as planned but state sponsored euthanasia isn't what it seems. The Reed family learns what really happens to retirees when secrets the UFN keep from the public start to unravel. This book is intended to be read by adults and may be unsuitable for children under 17. Contains indecent language and descriptions of graphic violence.

The Skeptics' Guide to the Universe Anchor

An all-encompassing guide to skeptical thinking from podcast host and academic neurologist at Yale University School of Medicine Steven Novella and his SGU co-hosts, which Richard Wiseman calls "the perfect primer for anyone who wants to separate fact from fiction." It is intimidating to realize that we live in a world overflowing with misinformation, bias, myths, deception, and flawed knowledge. There really are no ultimate authority figures-no one has the secret, and there is no place to look up the definitive answers to our questions (not even Google). Luckily, The Skeptic's Guide to the Universe is your map through this maze of modern life. Here Dr. Steven Novella-along with Bob Novella, Cara Santa Maria, Jay Novella, and Evan Bernstein-will explain the tenets of skeptical thinking and debunk some of the biggest scientific myths, fallacies, and conspiracy theories-from anti-vaccines to homeopathy, UFO sightings to N- rays. You'll learn the difference between science and pseudoscience, essential critical thinking skills, ways to discuss conspiracy theories with that crazy co- worker of yours, and how to combat sloppy reasoning, bad arguments, and superstitious thinking. So are you ready to join them on an epic scientific quest, one that has taken us from huddling in dark caves to setting foot on the moon? (Yes, we really did that.) DON'T PANIC! With The Skeptic's Guide to the Universe, we can do this

together. "Thorough, informative, and enlightening, The Skeptic's Guide to the Universe inoculates you against the frailties and shortcomings of human cognition. If this book does not become required reading for us all, we may well see modern civilization unravel before our eyes." -- Neil deGrasse Tyson "In this age of real and fake information, your ability to reason, to think in scientifically skeptical fashion, is the most important skill you can have. Read The Skeptics' Guide Universe; get better at reasoning. And if this claim about the importance of reason is wrong, The Skeptics' Guide will help you figure that out, too." -- Bill Nye

" I haven't read anything that has moved me this much since Wonder. " —Jennifer Niven, author of All the Bright Places A space-obsessed boy and his dog, Carl Sagan, take a journey toward family, love, hope, and awe in this funny and moving novel for fans of Counting by 7s, Walk Two Moons, and The Curious Incident of the Dog in the Night-Time. 11-year-old Alex Petroski loves space and rockets, his mom, his brother, and his dog Carl Sagan—named for his hero, the real-life astronomer. All he wants is to launch his golden iPod into space the way Carl Sagan (the man, not the dog) launched his Golden Record on the Voyager spacecraft in 1977. From Colorado to New Mexico, Las Vegas to L.A., Alex records a journey on his iPod to show other lifeforms what life on earth, his earth, is like. But his destination keeps changing. And the funny, lost, remarkable people he meets along the way can only partially prepare him for the secrets he ' ll uncover—from the truth about his long-dead dad to the fact that, for a kid with a troubled mom and a mostly not-around brother, he has way more family than he ever knew. Jack Cheng ' s debut is full of joy, optimism, determination, and unbelievable heart. To read the first page is to fall in love with Alex and his view of our big, beautiful, complicated world. To read the last is to know he and his story will stay with you a long, long time. "Stellar." —Entertainment Weekly " Life-embracing.
