School choice is an increasingly important part of today's educational landscape and this timely volume presents fresh research about the competitive admissions policies of choice systems. Based on their investigation of a unique civil rights challenge to school choice admissions policies in politically and racially divided Buffalo, New York, and the struggle to open its best schools to students of color, authors Orfield and Ayscue contend that without intentional effort, choice systems are likely to exacerbate problems of inequality and segregation. Focusing on issues that will continue to be contested in the courts and in the policy arena, the authors offer research-based recommendations for reducing barriers to enrollment and for creating competitive-admissions choice systems that will allow all students access to important educational opportunities. The book outlines specific steps school systems can take, including developing a district-wide diversity plan, providing more accessible information, conducting holistic admissions processes, expanding the availability of choices, and offering preparation programs to assist students long excluded from these highly competitive schools. Contributors: Natasha Amlani, Jongyeon Ee, Genevieve Siegel-Hawley, Jenna Tomasello, Brian Woodward "This important book ought to inspire a national debate. I hope it will be widely read." —Jonathan Kozol, education activist and bestselling author In the News: Buffalo Parents Slam School Distric's Response to Civil Rights Complaint: "This time around, parents with the District Parent Coordinating Council say that the proposal does not go far enough in addressing their complaints or the recommendations that Orfield proposed earlier this year." —Excerpt from Education Week (10/1/15)

The murals in restaurants are on a par with the food in museums. America is an enormous frosted cupcake in the middle of millions of starving people. Critics are like pigs at the pastry cart. Describing something by relating it to another thing is the essence of metaphorical thought. It is one of the oldest activities of humankind—and one of the most impressive when done skillfully. Throughout history, many masters of metaphor have crafted observations that are so spectacular they have taken up a permanent residence in our minds. In I Never Metaphor I Didn't Like, quotation maven Dr. Mardy Grothe fixes his attention on the three superstars of figurative language—analogies, metaphors, and similes. The result is an extraordinary compilation of nearly 2,000 feats of association that will entertain, educate, and occasionally inspire quotation lovers everywhere. In this intellectual smorgasbord, the author of Oxymoronica and Viva la Repartee explains figurative language in a refreshingly down-to-earth way before taking readers on a tour of history's greatest word pictures. In chapters on wit, love, sex, stage and screen, insults, politics, sports, and more, you will find quotations from Aristotle and Maya Angelou to George Washington and Oprah Winfrey.
