| article-by-article commentary on the text of the Chemical Weapons Convention (CWC) and its Annexes, one of the cornerstone disarmament and arms control agreements. It requires the verified elimination of an entire category of weapons of mass destruction and their means of production by all its States Parties within established time lines, and that prohibits any activities to develop or otherwise acquire such weapons. Cross-cutting chapters alongside the detailed commentary, by | those intimately involved in the development of the Convention, assess the history of the efforts to prohibit chemical weapons, the adoption of the Convention and the work of the Preparatory Commission, the entry into force of the Convention to the Second Review Conference, and the need for a new approach for the governance of chemical weapons. Written by those involved in its creation and implementation, this book critically reviews the practices adopted in | implementing the Convention, as well as the challenges ahead, and provides legal commentary on, and guidance for, its future role. It assesses how to adapt its implementation to advances in science and technology, including the discovery of new chemicals and the development of biochemical 'non-lethal' compounds that influence behaviour. It addresses the legal framework within which the Organization for the Prohibition of Chemical Weapons (OPCW) takes decisions, both with regard |
|---|--|--|

to the OPCW's own regulatory framework and regarding wider international norms, accepted principles, and practices. The Commentary draws conclusions on how the prohibitions against chemical weapons can be strengthened and the stature of the OPCW protected. It highlights the involvement of industry and academia in this prohibition, creating a symbiosis between effective governance and the legal framework of the Convention. This book is an authoritative, scholarly work

for anyone interested in the Chemical Weapons Convention, in international disarmament and arms control law, and in the work of international organizations, and a practical guide for individuals and institutions involved in the Convention's day-to-day implementation.

**Emergency Response
Guidebook**

This Commentary on
the verification
provisions of the
Chemical Weapons
Convention builds
on a previous

publication by the
same authors - A
Commentary on the
Chemical Weapons
Convention (Kluwer
1994). It focuses
on the verification
regime established
under the
Convention and
analyses the
results of the
preparatory phase
as well as the
practical
experience gathered
by the OPCW since
the entry into

| | | |
|--|--|---|
| force of the Chemical Weapons Convention in 1997. The book follows the methodological approach taken in the earlier publication - a paragraph by paragraph discussion of the text. It discusses those provisions which are relevant for the areas of verification where the OPCW has actually conducted | inspections and thus acquired practical experience (i.e. routine inspections of chemical weapons and related facilities, and facilities related to the chemicals listed under Schedule 1 and 2). The book is intended to stimulate and enrich the debate on a number of practical as well as legal issues | that have emerged during the practical implementation. It will be of interest to National Authorities and to diplomats following the implementation of the Chemical Weapons Convention, but also to practitioners in the chemical industry and related trade associations, international |
