Lord Rutherford has said that all science is either physics or stamp collecting. On that basis the study of forest biomass must be classified with stamp collecting and other such pleasurable pursuits. Japanese scientists have led the world, not only in collecting basic data, but in their attempts to systematise our knowledge of forest biomass. They have studied factors affecting dry matter production of forest trees in an attempt to approach underlying physical principles. This edition of Professor Satoo's book has been made possible the help of Dr John F. Hosner and the Virginia Poly technical Institute and State University who invited Dr Satoo to Blacksburg for three months in 1973 at about the time when he was in the final stages of preparing the Japanese version. Since then the explosion of world literature on forest biomass has continued to be fired by increasing shortages of timber supplies in many parts of the world as well as by a need to explore renewable sources of energy. In revising the original text I have attempted to maintain the input of Japanese work - much of which is not widely available outside Japan - and to update both the basic information and, where necessary, the conclusions to keep them in tune with current thinking. Those familiar with the Japanese original will find Chapter 3 largely rewritten on the basis of new work - much of which was initiated while Dr Satoo was in Blacksburg.

This review of Brazil's trade policy focuses on the manufacturing industry and its impact on industrial efficiency and manufactured export growth. It includes discussion of the Brazilian experience with policies to promote and regulate the development and acquisition of industrial technology and their impact on output and exports. The report is organized in three separate parts: (i) background on industrial development; (ii) a review of trade policies, concentrating on a quantification of the relative incentives for production oriented toward the domestic market and for exports; and (iii) a review of technology policy, including development of human resources, basic research and development, industrial technology, and technology transfer. Three case studies exemplify the main types of technological transfer. The report does not attempt to elaborate all possible policy implications but to present the main information and analytical tools to be considered in the preparation and evaluation of policy alternatives.
