The Cambridge Companion to Maimonides Random House From the ninth to the fifteenth centuries Jewish thinkers living in Islamic and Christian lands philosophized about Judaism. Influenced first by Islamic

theological speculation and the great philosophers of classical antiquity, and then in the late medieval period by Christian Scholasticism, Jewish philosophers and scientists reflected on the nature of language about God, the scope and limits of human understanding, the eternity or createdness of the world, prophecy and divine providence, the possibility of human freedom, and the relationship between divine and human law. Though many viewed philosophy as a dangerous threat, others incorporated it into their understanding of what it is to be a Jew. This Companion presents all the major Jewish thinkers of the period, the philosophical and non-philosophical contexts of their thought, and the interactions

between Jewish and non-Jewish philosophers. It is a comprehensive introduction to a vital period of Jewish intellectual history.

"Part of Our Lives challenges the conventional idea that public libraries are valuable mostly because they are essential to democracy. Instead, this book uses the voices of generations of public library users to argue that Americans have loved their libraries for the useful information they make accessible; the public spaces they provide; and the commonplace reading

materials they supply that help users make sense of the world around them."--

The director of my clinic is retiring and the job is up for grabs. I'd be lying if I said I didn't want the job for

myself, but I'd be happy if any of my colleagues got the promotion. But none of them get it. Neither do I. It's an outside hire. Atlas Beaumont. Super genius, but I think he's a super prick. Worst part of all? My father is the one who wrote his letter of recommendation, the one that impressed my boss so much that he hired him on the spot.

The Humanist Tradition Jack Mars

By going back to the Italian humanist tradition and aspects of earlier Greek and Latin

thought, Ernesto Grassi develops a conception of rhetoric as the basis of philosophy. Grassi explores the sense in which the first principles of rational thought come from the metaphorical power of the word. He finds the basis for his conception in the last great thinker of the Italian humanist tradition, Giambattista Vico (1668-1744). He concentrates on Vico's understanding of imagination and the sense of human ingenuity contained in metaphor. For Grassi, rhetorical activity is the essence and inner life of thought when

connected to the metaphorical power of the word. Originally published in English in 1980, *Rhetoric as Philosophy* has been out of print for some time. In his foreword to this reprint edition, Burke scholar Timothy W. Crusius rues the lack of concentrated attention to Grassi because "what he had to say about rhetoric is at least as significant as, for example, what Kenneth Burke taught us".

In this work, Muhsin Mahdi—widely regarded as the preeminent scholar of Islamic political thought—distills more

than four decades of research to offer an authoritative analysis of the work of Alfarabi, the founder of Islamic political philosophy. Mahdi, who also brought to light writings of Alfarabi that had long been presumed lost or were not even known, presents this great thinker as his contemporaries would have seen him: as a philosopher who sought to lay the foundations for a new understanding of revealed religion and its relation to the tradition of political philosophy. Beginning with a survey of Islamic philosophy and a discussion of its historical background, Mahdi considers the interrelated spheres of philosophy, political thought, theology, and jurisprudence of the

time. He then turns to Alfarabi's concept of "the virtuous city," and concludes with an in-depth analysis of the trilogy, *Philosophy of Plato and Aristotle*. This philosophical engagement with the writings of and about Alfarabi will be essential reading for anyone interested in medieval political philosophy. *Essays on Literacy* Harlequin 'Grace Burrowes is terrific!' One aim of this series is to dispel the intimidation readers feel when faced with the work of difficult and challenging thinkers. Moses ben Maimon, also known as Maimonides (1138 – 1204), represents the high point of Jewish rationalism in the middle

ages. He played a pivotal role in the transition of philosophy from the Islamic East to the Christian West. His greatest philosophical work, *The Guide of the Perplexed*, had a decisive impact on all subsequent Jewish thought and is still the subject of intense scholarly debate. An enigmatic figure, Maimonides continues to defy simple attempts at classification. The twelve essays in this volume offer a lucid and comprehensive treatment of his life and thought. They cover the sources on which Maimonides drew, his contributions to philosophy, theology, jurisprudence, and Bible commentary, as well as his esoteric writing style and influence

on later thinkers.
