Delivers the foundational and practical knowledge required for pharmacists to become an integral part of the veterinary health care team, improving therapeutic outcome while preventing serious adverse drug reactions in veterinary patients

Pharmacotherapeutics for Veterinary Dispensing enables pharmacists and pharmacy students to expand the breadth of their pharmacological knowledge

to include common veterinary species. The book offers a practical yet complete resource for dispensing drugs for canine and feline patients, with additional chapters on horses, birds, reptiles, small mammals, and food animals. Edited by a globally recognized expert in veterinary pharmacology, and including chapters written by veterinarians with expertise in pharmacotherapy and pharmacists with expertise in veterinary medicine, this book is designed to help pharmacists enhance the quality of veterinary patient

care. This book is the first to combine the expertise of both veterinarians and pharmacists to enable pharmacists to apply their knowledge and skills to assure optimal therapeutic outcomes for patients of all species. Pharmacotherapeutics for Veterinary Dispensing: Puts the information needed to safely dispense prescription and OTC drugs for veterinary patients at the pharmacists' fingertips Focuses on crucial details of canine and feline pharmacotherapeutics Helps pharmacists avoid adverse drug reactions including

pharmacogenomic and breed-related drug sensitivities Offers an authoritative resource written by leading veterinary pharmacy experts designed to integrate pharmacists into the veterinary healthcare team Includes crucial regulatory information unique to veterinary drug dispensing and compounding Pharmacotherapeutics for Veterinary Dispensing is an essential reference for all pharmacists and pharmacy students that might find themselves dispensing drugs to veterinary patients, as well as for veterinarians and others

involved with dispensing veterinary drugs.

The second edition of Extrusion is designed to aid operators, engineers, and managers in extrusion processing in quickly

answering practical day-to-day questions. The first part of the book provides the fundamental principles, for operators and engineers, of polymeric materials extrusion processing in single and twin screw extruders. The next section covers advanced topics including troubleshooting, auxiliary equipment, and coextrusion for operators, engineers, and managers. The final part provides applications case studies in key areas for engineers such as compounding, blown film,

extrusion blow molding, coating, foam, and reprocessing. This practical guide to extrusion brings together both equipment and materials processing aspects. It covers basic and advanced topics, for reference and training, in thermoplastics processing in the extruder. Detailed reference data are provided on such important operating conditions as temperatures, start-up procedures, shear rates, pressure drops, and safety. A practical guide to the selection, design and

optimization of extrusion processes and equipment
Designed to improve production efficiency and product quality
Focuses on practical fault analysis and troubleshooting techniques

Liposuction is the first cosmetic procedure to change beautification surgery from open extensive excision surgery into a more atraumatic closed one. It gave rise to the modern understanding of minimally scarring and minimally invasive surgery and changed the understanding and preferences of both patients and doctors. It also

became the most common procedure in cosmetic surgery world-wide, practiced by an increased number of physicians from various specialties. The techniques of fat grafting, closely bound with liposuction, have found widespread application and fat stem cells seem to be changing the future of many areas in medicine. Turning the pages, the reader will find a lot of information about advances, tips and tricks, as well as important milestones in the development of the different methods available, such as classic, power, ultrasound, laser and radio-frequency assisted liposuction etc. Most useful anesthesia techniques are described and discussed, and

guidelines have been established for medical indications. Special attention is paid to good patient selection, complications and risks.

Citroen C3 BoD – Books on Demand

This book offers a comprehensive coverage of process simulation and flowsheeting, useful for undergraduate students of Chemical Engineering and Process Engineering as theoretical and practical support in Process Design, Process Simulation, Process Engineering, Plant Design, and Process Control courses.

The main concepts related to process simulation and application tools are presented and discussed in the framework of typical problems found in engineering design. The topics presented in the chapters are organized in an inductive way, starting from the more simplistic simulations up to some complex problems.

The 2018 FAO-OIE-WHO (Tripartite) zoonoses guide, "Taking A Multisectoral, One Health Approach: A Tripartite Guide to Addressing Zoonotic

Diseases in Countries ” (2018 TZG) is being jointly developed to provide member countries with practical guidance on OH approaches to build national mechanisms for multisectoral coordination, communication, and collaboration to address zoonotic disease threats at the animal-human-environment interface. The 2018 TZG updates and expands on the guidance in the one previous jointly-developed, zoonoses-specific guidance document: the 2008 Tripartite “ Zoonotic Diseases: A Guide to Establishing Collaboration between Animal and Human Health Sectors at the Country Level ” , developed in WHO South-East Asia Region

and Western Pacific Region. The 2018 TZG supports building by countries of the resilience and capacity to address emerging and endemic zoonotic diseases such as avian influenza, rabies, Ebola, and Rift Valley fever, as well as food-borne diseases and antimicrobial resistance, and to minimize their impacts on health, livelihoods, and economies. It additionally supports country efforts to implement WHO International Health Regulations (2005) and OIE international standards, to address gaps identified through external and internal health system evaluations, and to achieve targets of the Sustainable Development Goals. The 2018 TZG provides relevant country

ministries and agencies with lessons learned and good practices identified from country-level experiences in taking OH approaches for preparedness, prevention, detection and response to zoonotic disease threats, and provides guidance on multisectoral communication, coordination, and collaboration. It informs on regional and country-level OH activities and relevant unisectoral and multisectoral tools available for countries to use.
