Heavy or harsh impacts such as collision can cause your vehicle to visibly crack and can affect almost any part of your car — the wheel, grille, bumpers, fenders, and mirrors. Oftentimes, cracks require replacement as they're difficult or beyond restoration and mere buffing out. Bent Frames. In the majority of collisions, the vehicle's frame can be thoroughly bent and would need more than just body repairs, as internal working can be affected.

These vehicles have damage to the structural frame or chassis, which can be repaired, but the self-insured owner or insurer has decided not to repair the vehicle. To make it easier for car buyers to tell whether a car has been involved in a crash that has led to a structural repair, category S vehicles will have their vehicle registration document (V5C) marked with an S and include the wording:

[Structural Sectioning Procedures: Audi - I-CAR RTS](#)

Unfortunately, this means that a unibody vehicle can more easily develop major structural damage in a crash. If the cost to repair a given vehicle is more than its value was before the accident, the insurance company will likely declare the car to be a total loss. Totaled vehicles are usually scrapped and issued what's known as a salvage title. Be wary of any used car that's been repaired and sold with a salvaged title, no matter how great a deal it seems.
