“Veni, Vidi, Vici taps into the human desire to connect with the animal world nicely. Jackson knows her subject intimately, and that comes through loud and clear in Veni’s story.” BlueInk Review Four Stars (out of Five) “Jackson uses a simple, straightforward writing style to convey Veni’s thoughts. There are no fancy words or detailed thought processes, but the absence of these elements only highlights the simple-minded nature most dogs have, without suggesting that Veni isn’t smart in a very canine way.” Foreword-Clarion Reviews “Veni is larger than life, and her voice makes for fun reading.” Kirkus Reviews Veni is a Pumi puppy from Hungary, but she has recently been adopted by a new family from the United States and moves to their ranch in California. In this collection of letters, Veni describes her new life for her auntie back home. At first, she doesn’t think it’s fair that she has to leave her old home,

learn English, and learn to get along with her new doggie housemates—Levi, another Pumi who teases her, and Demi, a standard poodle who hates her right from the start. What’s more, it seems her new human mom trains dogs for a living, and now Veni has to learn to be on her best behavior all the time. And that’s not easy for a dog who likes to get into so much trouble! She also exchanges letters with some puppy pen pals and runs the risk of getting sent to Soledog Dog Prison due to her wicked ways. Written with humor from a puppy’s perspective, Veni, Vidi, Vici shares the crazy events of one dog’s first years with her new family.

From the twelfth century, a growing sense of cultural confidence in the Latin West (at the same time that the central lands of Islam suffered from numerous waves of conquest and devastation) was accompanied by the increasing importance of the genre of empirical ethnographies. From a global perspective what is most distinctive of Europe is the genre's long-term impact rather than its mere empirical potential, or its ethnocentrism (all of which can also be found in China and in Islamic cultures). Hence what needs emphasizing is the multiplication of original writings over time, their increased circulation, and their authoritative status as a 'scientific' discourse. The empirical bent was more characteristic of travel accounts than of theological disputations - in fact, the less

elaborate the theological discourse, the stronger the ethnographic impulse (although many travel writers were clerics). This anthology of classic articles in the history of medieval ethnographies illustrates this theme with reference to the contexts and genres of travel writing, the transformation of enduring myths (ranging from oriental marvels to the virtuous ascetics of India or Prester John), the practical expression of particular encounters from the Mongols to the Atlantic, and the various attempts to explain cultural differences, either through the concept of barbarism, or through geography and climate.

The World of Rome is an introduction to the history and culture of Rome for students at university and at school as well as for anyone seriously interested in the ancient world. Drawing on the latest scholarship, it

covers all aspects of the city - its rise to power, what made it great, and why it still engages and challenges us today. The first two chapters outline the history and changing identity of Rome from 1000 BC to AD 476. Subsequent chapters examine the mechanisms of government, the economic and social life of Rome, and Roman ways of looking at and reflecting the world. Frequent quotations from ancient writers and numerous illustrations make this a stimulating and accessible introduction to ancient Rome. The World of Rome is particularly designed to serve as a background book to Reading Latin (Cambridge University Press, 1986).

How Rome Fell Atlantic Books

Abstract:

Latin Quips at Your Fingertips FriesenPress

Author and historian Tom Holland returns to his roots in Roman history and the audience he cultivated with *Rubicon*—his masterful, witty, brilliantly researched popular history of the fall of the Roman republic—with *Dynasty*, a

luridly fascinating history of the reign of the first five Roman emperors. Dynasty continues Rubicon's story, opening where that book ended: with the murder of Julius Caesar. This is the period of the first and perhaps greatest Roman Emperors and it's a colorful story of rule and ruination, running from the rise of Augustus through to the death of Nero. Holland's expansive history also has distinct shades of I Claudius, with five wonderfully vivid (and in three cases, thoroughly depraved) Emperors—Augustus, Tiberius, Caligula, Claudius, and Nero—featured, along with numerous fascinating secondary characters. Intrigue, murder, naked ambition and treachery, greed, gluttony, lust, incest, pageantry, decadence—the tale of these five Caesars continues to cast a mesmerizing spell across the millennia.

[How to Win and Achieve All That You Want from Life!](#) Atlantic Books (UK)

A groundbreaking exploration of why we want what we want, and a toolkit for freeing ourselves from chasing unfulfilling desires. Gravity affects every aspect of our physical being, but there's a psychological force just as powerful - yet almost nobody has heard of it. It's responsible for bringing groups of people together and pulling them apart, making certain goals attractive to some and not to others, and fueling cycles of anxiety and conflict. According to French polymath Ren é Girard, humans don't desire anything independently. Human desire is mimetic - we imitate what other people want. This affects the way we choose partners, friends, careers, clothes, and vacation destinations. Mimetic desire is responsible for the formation of our very identities. It explains the enduring relevancy of Shakespeare's plays, why Peter Thiel decided to be the first investor in Facebook, and why our world is growing more

divided as it becomes more connected. Drawing on his experience as an entrepreneur, teacher, and student of classical philosophy and theology, Burgis shares tactics that help turn blind wanting into intentional wanting - not by trying to rid ourselves of desire, but by desiring differently. It's possible to be more in control of the things we want, to achieve more independence from trends and bubbles, and to find more meaning in our work and lives. The future will be shaped by our desires. Wanting shows us how to desire a better one.

Wheelock's Latin, 6th Edition Revised
University of Texas Press

In this revealing and entertaining guide to how the Romans confronted their own mortality, Peter Jones shows us that all the problems associated with old age and death that so transfix us today were already dealt with by our ancient ancestors two thousand

years ago. Romans inhabited a world where man, knowing nothing about hygiene let alone disease, had no defences against nature. Death was everywhere. Half of all Roman children were dead by the age of five. Only eight per cent of the population made it over sixty. One bizarre result was that half the population consisted of teenagers. From the elites' philosophical take on the brevity of life to the epitaphs left by butchers, bakers and buffoons, Memento Mori ('Remember you die') shows how the Romans faced up to this world and attempted to take the sting out of death.
