As voters articulate their judgments of the parties and leaders in their fifth democratic election, *Election 2014 South Africa: The Campaigns, Results & Future Prospects* provides a platform for in-depth discussion and analysis of party campaigns, voting patterns, and election results of the 2014 general elections. Following the tradition of previous volumes that cover South Africa's national and provincial elections since 1994, this book draws on the

expertise of renowned authors to cover important aspects of the election, including the major political party campaigns, the media's coverage of the campaigns, the latest trends in political participation and party fortunes, gender dynamics, the black middle class, as well as insights into the voter and public opinion on the eve of the election. Readers are presented with more than a mere study of a single election; they are also presented with a contemporary understanding of electoral politics and democracy in South Africa over two democratic decades and reflections on how elections strengthen the quality and prospects for democracy.

This Multi-level Governance Series study focuses on Ukraine's advances in regional development, territorial reform and

decentralisation since 2014. The Government launched a reform to merge local governments and strengthen the decentralisation process, giving additional power and resources to sub-national authorities. In a short period, successful steps have been taken toward achieving municipal mergers and greater fiscal, administrative and political decentralisation, complemented by the State Strategy for Regional Development 2015-2020. The first local elections have been held and more public services are being delivered by certain local authorities. Yet, important challenges remain, ranging from a need to address rising disparities and adjusting multi-level governance practices and territorial

structures, to better structuring fiscal decentralisation. This report addresses regional performance and disparities in Ukraine, provides insight into Ukraine's current territorial reform and approach to decentralisation, explores the impact of fiscal decentralisation measures, and includes a case study of the transport sector. It also provides a set of recommendations for action to support Ukraine in meeting the conditions for successful decentralisation.
