Reminiscences of Michael Kelly of the King's theatre, and Theatre royal, Drury lane [ed. by T.E. Hook]. Univ. of Tennessee Press

The management of financial crises in emerging markets is a vital and high-stakes challenge in an increasingly global economy. For this reason, it's also a highly contentious issue in today's public policy circles. In this book, leading economists-many of whom have also participated in policy debates on these issues-consider how best to reduce the frequency and cost of such crises. The contributions here explore the management process from the beginning of a crisis to the long-term effects of the techniques used to minimize it. The first three chapters focus on the earliest responses and the immediate defense of a currency under attack, exploring whether unnecessary damage to economies can be avoided by adopting the right response within the first few days of a financial crisis. Next, contributors examine the adjustment programs that follow, considering how to design these programs so that they shorten the recovery phase, encourage economic growth, and minimize the probability of future difficulties. Finally, the last four papers analyze the actual effects of adjustment programs, asking whether they accomplish what they are designed to do-and whether, as many critics assert, they impose disproportionate costs on the poorest members of society. Recent high-profile currency crises have proven not only how harmful they can be to neighboring economies and trading partners, but also how important policy responses can be in determining their duration and severity.

Economists and policymakers will welcome the insightful evaluations in this important volume, and those of its companion, Sebastian Edwards and Jeffrey A. Frankel's Preventing Currency Crises in Emerging Markets.

It is, of course, too early to propose an assessment of the final impact of the Chinese and Indian ascents on the world affairs, as their rise is still an ongoing process and is still eroding the foundation of the current international system. The dynamic side of the question makes us risk both risks of under- and overestimation of China and Indias future influence. China and India have gained considerable weight in Asian affairs, to the point that, in the Chinese case, one might wonder about the possibility for a future power transition at the regional level, with the United States in the unenviable role of the declining power. Chinese and Indian expanding interests outside the narrow limits of the Asian region have also grown, mainly thanks to their surging needs for energy and raw materials. This book provides reliable information which indicate the ground trends for the rising competition between China and India.

This book comprises expository articles on different aspects of gravitation and cosmology that are aimed at graduate students. The topics discussed are of contemporary interest assuming only an elementary introduction to gravitation and cosmology. The presentations are to a certain extent pedagogical in nature, and the material developed is not usually found in sufficient detail in recent textbooks in these areas.

The Plan of Nashville is a community-based vision of how the urban core of Nashville should look and work in the 21st century. The purpose is to help the central city hold its place in civic life. Since Nashville assumed a metropolitan form of government - merging city and county - there have been almost a hundred plans that dealt with some aspect of the center city. This plan is different. The Plan was conceived and orchestrated by the Nashville Civic Design Center, which is committed to the practice of urban design. This three-dimensional discipline integrates streets and buildings, land use and transportation - a new

approach for Nashville. As a private not-for-profit, the center listens with independent ears and speaks with an independent voice. Previous plans by Metro government departments and their consultants were constrained by politics and patronage, by available funding or the need to solve specific problems. Plan of Nashville is not an island bound by the noose of the interstate loop. The Plan integrates downtown with the areas that frame it via the spoke roads that are the historic entries into downtown. Rather than taking a top down approach, the design center organized the process of listening to the community. Over 400 citizens attended a series of workshops in downtown and the surrounding neighborhoods to express their opinions and draw their dreams. The center's staff translated the results into a series of maps and illustrations, with explanatory text - that articulate a three-dimensional vision for the city that will serve as a litmus test for current and future development.

In examining the economic and social reforms of Gorbachev's Soviet Union, the contributors to this new study provide a broad portrait of the state of current soviet relations with the countries of the Asia-Pacific region, the prospects for change, and the perceived role of the Soviet Union in that change. Leading established scholars and specialists from the countries of the Asia-Pacific region study this new Soviet phenomenon and evince a mixture of enthusiasm and apprehension about Moscow's new policy overtures to the region. Mikhail Gorbachev's speech in the Soviet Far East city of Vladivostok on July 28, 1986, was widely read and commented upon throughout East and Southeast Asia, and raised many unanswered questions: How much has the Soviet Union really changed? Will China, the principal target of Soviet overtures, respond positively and, if so, what will the implications be for the rest of the region? What do these sweeping changes mean for the region in practical terms? The Soviet Union and the Asia-Pacific Region considers these questions and offers insight and provocative commentary on the current attitudes of the many Asia-Pacific countries toward the Soviet Union.

When a disaster or emergency occurs, it is the responsibility first of the local community and the State or Tribe to respond. However, their combined efforts at times are not sufficient to effectively address the direct results of the

most serious events. These situations call for Federal assistance. The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. section 5121-5207, authorizes the President to provide Federal assistance to supplement State, Tribal, and local efforts. The Federal Emergency Management Agency (FEMA), a component of the Department of Homeland Security, coordinates the delivery of assistance under the law and provides grants through the Public Assistance Program to help with the extraordinary costs for response and infrastructure recovery. This Handbook explains how applicants can obtain help through the Public Assistance Program. Potential recipients of this assistance include State, Tribal, and local governments and certain types of private nonprofit organizations.
